DEPARTMENT OF VETERANS AFFAIRS
OFFICE OF INSPECTOR GENERAL
WASHINGTON, DC 20001

January 16, 2026

MEMORANDUM

TO: The Honorable Douglas A. Collins
Secretary of Veterans Affairs (00)

FROM: Larry Reinkemeyer, Assistant Inspector General
Office of Audits and Evaluations, VA Office of Inspector General (52)

THRU: The Honorable Cheryl L. Mason, Inspector General
VA Office of Inspector General (50)

SUBJECT: Audit of VA's Financial Statements for Fiscal Year 2025

1. The VA Office of Inspector General (OIG) contracted with the independent public accounting firm Kearney & Company, P.C. (Kearney) to audit VA's consolidated financial statements as of September 30, 2025, and for the fiscal year then ended. This audit is a requirement of section 304 of the Chief Financial Officers Act of 1990, Public Law 101-576, 31 U.S.C. § 3521(e).
2. The results of the audit are presented in the attached Independent Auditor's Report; Independent Auditor's Report on Internal Control over Financial Reporting; and Independent Auditor's Report on Compliance with Laws, Regulations, Contracts, and Grant Agreements.
3. Kearney provided an unmodified opinion on VA's financial statements for fiscal year 2025. An unmodified opinion means that the financial statements as of and for the year ended September 30, 2025, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States. Kearney did, however, note material weaknesses and significant deficiencies in internal control and instances of noncompliance with applicable laws.
4. Regarding internal control, Kearney identified two material weaknesses. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. The two material weaknesses concern
 - information technology and
 - internal use software.

5. Kearney also identified three significant deficiencies. A significant deficiency is a deficiency, or combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness yet important enough to merit attention by those charged with governance. The three significant deficiencies concern
 - loan guarantee liability,
 - service organization monitoring and complementary user entity controls, and
 - medical service revenue and accounts receivable.
6. Regarding noncompliance with applicable laws and regulations, Kearney reported
 - VA's financial management systems did not comply substantially with requirements of section 803 of the Federal Financial Management Improvement Act of 1996, Public Law 104-208, Title VIII, 31 U.S.C. § 3512 note, related to federal financial management system requirements and the application of the United States Standard General Ledger at the transaction level, and
 - noncompliance with the Federal Managers' Financial Integrity Act of 1982, Public Law 97-255, 31 U.S.C. § 3512.
7. Kearney is responsible for the attached audit reports dated January 16, 2026, and the conclusions expressed in the reports. The OIG does not express opinions on VA's financial statements, internal control, or compliance with the Federal Financial Management Improvement Act, nor does the OIG express conclusions on VA's compliance with laws, regulations, contracts, or grant agreements.
8. The independent auditor will follow up on the internal control and compliance findings in the attached reports and evaluate the adequacy of corrective actions taken during the fiscal year 2026 audit of VA's financial statements.

INDEPENDENT AUDITOR'S REPORT

To the Secretary, Chief Financial Officer, and Inspector General of the Department of Veterans Affairs

Report on the Audit of the Financial Statements***Opinion***

We have audited the consolidated financial statements of the United States Department of Veterans Affairs (VA), which comprise the consolidated Balance Sheet as of September 30, 2025, the related consolidated Statements of Net Cost and Changes in Net Position, and the combined Statement of Budgetary Resources (hereinafter referred to as the “financial statements”) for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of VA as of September 30, 2025 and its net cost of operations, changes in net position, and budgetary resources for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS); the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States of America; and Office of Management and Budget (OMB) Bulletin No. 24-02, *Audit Requirements for Federal Financial Statements*. Our responsibilities under those standards are further described in the ***Auditor's Responsibilities for the Audit of the Financial Statements*** section of our report. We are required to be independent of VA and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for: 1) the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; 2) the preparation, measurement, and presentation of required supplementary information (RSI) in accordance with generally accepted accounting principles in the United States of America; 3) the preparation and presentation of other information included in VA's Agency Financial Report (AFR), as well as ensuring the consistency of that information with the audited financial statements and the RSI; and 4) the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about VA's ability to continue as a going concern for a reasonable period of time beyond the financial statement date.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements, as a whole, are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of VA's internal control. Accordingly, no such opinion is expressed
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about VA's ability to continue as a going concern for a reasonable period of time beyond the financial statement date.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis, Deferred Maintenance and Repairs, Combining Statement of Budgetary Resources, and Land be presented to supplement the financial statements. Such information is the responsibility of management and, although not a part of the financial statements, is required by OMB and the Federal Accounting Standards Advisory Board (FASAB), who consider it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the RSI in accordance with GAAS, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Management is responsible for the other information included in the AFR. The other information comprises the Inspector General's Management and Performance Challenges, Summary of Financial Statement Audit and Management Assurances, Payment Integrity Information Act Reporting, Civil Monetary Adjustment for Inflation, Grant Programs, and Financial Reporting-Related Legislation but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards* and OMB Bulletin No. 24-02, we have also issued reports, dated January 16, 2026, on our consideration of VA's internal control over financial reporting and on our tests of VA's compliance with certain provisions of laws, regulations, contracts, and grant agreements, as well as other matters. The purpose of those reports is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of VA's internal control over financial reporting or on compliance. Those reports are an integral part of an audit performed in accordance with *Government Auditing Standards* and OMB Bulletin No. 24-02 in considering VA's internal control over financial reporting and compliance.

Alexandria, Virginia
January 16, 2026

**INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING**

To the Secretary, Chief Financial Officer, and Inspector General of the Department of Veterans Affairs

We have audited, in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 24-02, *Audit Requirements for Federal Financial Statements*, the financial statements, and the related notes to the financial statements of the Department of Veterans Affairs (VA) as of and for the year ended September 30, 2025, which collectively comprise VA's financial statements, and we have issued our report thereon dated January 16, 2026.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered VA's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of VA's internal control. Accordingly, we do not express an opinion on the effectiveness of VA's internal control. We limited our internal control testing to those controls necessary to achieve the objectives described in OMB Bulletin No. 24-02. We did not test all internal controls relevant to operating objectives as broadly defined by the Federal Managers' Financial Integrity Act of 1982, such as those controls relevant to ensuring efficient operations.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies; therefore, material weaknesses or significant deficiencies may exist that have not been identified. However, as described in the accompanying **Schedule of Findings**, we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in VA's internal control described in the accompanying **Schedule of Findings** as Items I and II to be material weaknesses.

A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies in VA's internal control described in the accompanying **Schedule of Findings** as Items III, IV, and V to be significant deficiencies.

The Department of Veterans Affairs' Response to Findings

Government Auditing Standards requires the auditor to perform limited procedures on VA's response to the findings identified in our audit. VA's response is described in a separate memorandum attached to this report in the "Financial Section" of the Agency Financial Report. VA concurred with the findings identified in our engagement. VA's response was not subjected to the other auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on the response.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing, and not to provide an opinion on the effectiveness of VA's internal control. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* and OMB Bulletin No. 24-02 in considering VA's internal control. Accordingly, this report is not suitable for any other purpose.

(/s) Kearney & Company, P.C.

Alexandria, Virginia
January 16, 2026

Schedule of Findings

Material Weaknesses

I. Information Technology (*Repeat Condition*)

Background: The Department of Veterans Affairs (VA) operates a complex information system environment to execute its mission and record transactions completely, timely, and accurately using a combination of financial, non-financial, and mixed-use systems. This includes third-party systems owned and operated by organizations outside of VA that affect VA's business processes and financial statements. VA's Office of Information and Technology (OIT) provides the technology and information technology (IT) systems on which Veterans, clinicians, medical providers, and benefits providers rely. OIT is responsible for developing, implementing, enforcing, and monitoring controls across VA. Information System Owners (ISO) are responsible for ensuring that all applicable controls are implemented, operated, and continuously monitored. VA's Administrations are responsible for the user community that is expected to adhere to VA and ISO standards.

National Institute of Standards and Technology Special Publications, along with Office of Management and Budget (OMB) Circular A-130, *Managing Information as a Strategic Resource*, provide policies and guidance for managing Federal information systems and protecting Federal data. Because of the sensitive nature of VA's information system environment, Kearney & Company, P.C. (Kearney) does not present specific details related to the systems, conditions, or criteria discussed within this material weakness. We provided those details separately to VA management and relevant stakeholders through Notices of Findings and Recommendations (NFR).

Conditions: VA has control deficiencies in the design, implementation, and operating effectiveness of internal controls related to financially significant systems, which could have a material effect on the financial statements. Internal control deficiencies exist in 30 financially significant systems, including three general ledger (GL) and financial reporting systems, one health IT system, 12 other key financial systems, and 14 environments, datacenters, and general support systems (GSS). The following is a summary of critical internal control deficiencies, organized by control family:

Access Controls: VA's access controls over financially significant systems and GSSs are not suitably designed in all instances or completely and consistently implemented and/or operating effectively across VA. Internal control testing over access controls identified weaknesses across 18 financially significant systems and environments. The following conditions were noted:

- Account management controls have not been completely designed and consistently implemented, monitored, and/or enforced across VA

- Periodic access recertification processes were not developed, implemented, monitored, and/or enforced consistently to review privileged and non-privileged user accounts to verify that users still require access and their roles are appropriate based on job function and least privilege
- Identification and authentication controls over privileged user accounts and application passwords are not suitably designed and consistently implemented in accordance with policy
- Authorization documentation for privileged database and operating system users and accounts added during fiscal year (FY) 2025 was incomplete or could not be provided, and some privileged users gained access to the system prior to obtaining all required approvals
- Authorization documentation for application users added during FY 2025 was incomplete or could not be provided, roles assigned in the system did not match the roles authorized, and some users gained access to the application before obtaining all required approvals.

Configuration Management: VA's configuration management controls over baseline monitoring were not designed, implemented, and/or operating effectively in accordance with VA policy. Processes were not in place to monitor databases supporting critical financial reporting and other information systems for compliance with the VA enterprise secure configuration baselines (ESCB). VA did not provide evidence to show that the configuration settings for all configurable information system components are being monitored for compliance with VA-approved baselines. Additionally, inspection of VA's baseline monitoring reports across 13 systems and environments identified the following conditions:

- Instances where VA systems were not compliant with the ESCB and deviations from the ESCB were not identified, documented, and approved in accordance with VA policy
- Software and services that were not authorized by the Technical Reference Model to operate on components of the information systems tested.

Vulnerability Management: VA's vulnerability management controls are not designed and/or operating effectively to prevent known critical and high-risk vulnerabilities from existing or persisting on VA's network and to protect systems and data relevant to VA's financial statements from unauthorized access, use, modification, or destruction. Testing across 12 VA sites identified instances of the following:

- Unsupported software
- Configuration weaknesses
- Systems that were not up to date with vendor-supplied patches
- Vulnerable software versions
- Vulnerabilities publicly known since 2024 or earlier
- Known exploited vulnerabilities that had not been remediated by the Cybersecurity and Infrastructure Security Agency-mandated due dates.

Security Management: VA's internal controls over security control assessments (SCA), privacy impact assessments (PIA), interfaces, and Plans of Action and Milestones (POA&M) were not designed, implemented, and/or operating effectively in accordance with VA policy. Testing identified the following conditions:

- An SCA by independent assessors had not been performed, or was not scheduled to be performed, within three years of the Authorization to Operate for 12 systems or GSSs
- The privacy threshold analysis for three GSSs identified changes that required the PIA to be updated; however, the PIAs have not been updated to address the changes
- The Interconnection Security Agreement (ISA) and Memorandum of Understanding (MOU) between a key GL system and an external information provider expired in March 2024 and had not been updated as of August 2025
- POA&Ms for the two GL systems were not reviewed in accordance with VA policy.

IT Governance: VA IT governance controls are not suitably designed, consistently implemented, and/or operating effectively to monitor and enforce compliance across VA, remediate deficiencies once identified, and meet effective communication requirements. The following conditions factor into VA's ineffective IT governance:

- Internal control deficiencies in the consistent implementation and performance of VA's access controls, configuration management, vulnerability management, and security management controls over financially significant systems were identified in current and prior audits
- VA OIT management did not completely document, maintain, or report corrective action plans to remediate internal control deficiencies on a timely basis
- VA OIT did not communicate quality information relating to events and activities that impact the internal control system to the external auditor in response to audit requests in a timely manner throughout the audit.

Cause: VA operates a complex IT environment with a mix of legacy and newer financial, non-financial, and mixed-use systems dispersed across multiple datacenters and environments, managed by separate Administrations, program offices, and ISOs. VA is transitioning towards enterprise solutions and automated monitoring tools but is currently in a hybrid model as it works to blend and enhance legacy technology solutions with automated technology. As a result of this transition, combined with the inherent challenges in VA's complex, legacy, dispersed, and decentralized IT environment, VA and OIT management did not consistently or completely design, implement, perform, monitor, and/or enforce standardized control policies and procedures for all IT areas across VA.

Effect: Without sufficient and effective account management, periodic access review, and identification and authentication controls throughout the information system environment, privileged and non-privileged users may possess or retain unauthorized access to systems. Accordingly, these users may intentionally or unintentionally abuse computer resources, process unauthorized transactions, or perform other actions that jeopardize the confidentiality, integrity, or availability of systems and data without timely detection in the normal course of business.

Without sufficient and effective configuration management and vulnerability management controls to ensure systems and networks meet the minimally acceptable system configurations and to ensure vulnerabilities are not introduced onto the network, security features may be inadvertently or deliberately omitted or turned off. Accordingly, processing irregularities or significant security vulnerabilities may be introduced and exploited, leading to severe issues, such as data breaches, operational disruptions, network failures, security gaps, or costly downtime, and resulting in a loss of confidentiality, integrity, or availability of systems and data.

Without sufficient and effective independent SCAs, documentation, monitoring, and implementation of corrective actions and plans to remediate known deficiencies, ISAs/MOUs, and internal control documentation to facilitate effective communication and monitoring of internal control implementation and operation, security controls may be inadvertently or deliberately omitted or overlooked and control deficiencies may go unidentified or unresolved once identified, resulting in a loss of confidentiality, integrity, or availability of systems and data, as well as a loss of confidence and reliance on the IT control environment and controls.

Recommendations: Kearney recommends that VA perform the following:

1. Design controls and update relevant policies and procedures to address design gaps and areas for improvement in access controls, configuration and vulnerability management, and security management and governance.
2. Implement entity-level IT policies and procedures across all VA ISOs, offices, privileged users, and end users, then reinforce via training for consistent implementation and operation.
3. Implement, monitor, and enforce consistent processes and control activities over access controls, configuration and vulnerability management, and security management and governance.
4. Retain documentation to support the implementation and effective operation of internal control procedures.

II. Internal Use Software (*New Condition*)

Background: VA is in the process of implementing the new Federal Electronic Health Record (EHR) system to store and track patient medical information. This effort is known as VA's Electronic Health Record Modernization (EHRM). The EHRM Project began in FY 2018 and will replace the legacy Veteran Information Systems and Technology Architecture (VistA) system. Through FY 2025, the EHRM is now in use at six VA Medical Centers (VAMC); however, full deployment and implementation remains in process. Expenditures associated with the EHRM Project are approximately \$10.6 billion since inception.

OIT is responsible for planning, managing, and overseeing VA's information resources. OIT's Enterprise Program Management Office (EPMO) is responsible for acquisition, as well as the management of software in-development projects. VA established a separate office for the EHRM Project, the Office of Electronic Health Record Modernization (OEHRM). OIT provides technical oversight and governance support for the EHRM Project. Financial management,

accounting, and financial reporting of EHRM expenditures are the responsibility of OEHRM and the Office of Management's (OM) Financial Services Center (FSC).

Statement of Federal Financial Accounting Standards (SFFAS) No. 10, *Accounting for Internal-Use Software*, defines software as including the application and operating system programs, procedures, rules, and any associated documentation pertaining to the operation of a computer system or program. “Internal use software” (IUS) refers to software that is purchased from commercial vendors “off-the-shelf,” internally developed, or contractor-developed solely to meet the entity’s internal or operational needs. The EHRM is a Commercial Off-the-Shelf product requiring internally developed and contractor-developed design, programming, installation, and implementation. VA is responsible for establishing appropriate policy and procedures, with supporting internal controls, to properly account for IUS and IUS in development (IUSD) to ensure appropriate financial reporting.

Condition: VA did not establish appropriate processes to identify, track, and accumulate costs of the EHRM Project to support proper accounting classification and financial reporting requirements. VA did not report the EHRM Project as a capital asset as part of the opening balance of IUS/IUSD for FY 2025, as required by Federal accounting standards. To correct the improper accounting treatment of the EHRM Project, in FY 2025, VA established a methodology to analyze EHRM expenditures from FYs 2018 to 2025 to identify and estimate the costs to be recorded as a capital asset. The analysis resulted in a correcting entry of approximately \$4.6 billion to properly report the EHRM Project as a capital asset as of September 30, 2025.

Cause: As an independent program office established specifically for the EHRM Project, OEHRM was not subject to the OIT EPMO’s internal control framework established for proper accounting and reporting of IUS and IUSD. VA did not properly extend to OEHRM the IUS and IUSD internal controls which were established for other program offices authorized to procure fixed assets. Specifically, internal control activities were not established within OEHRM over the following areas

- Project initiation and set-up
- Work in process (WIP) accumulation
- WIP reconciliation
- Project close-out and capitalization.

Additionally, VA did not complete a sufficient and appropriate Enterprise-wide risk assessment to appropriately monitor completeness of IUS and IUSD projects for proper capitalization. The EHRM Project is a highly visible program with material expenditures accumulating across multiple FYs, which went undetected as IUSD.

Effect: Without appropriate processes and internal controls to identify and track IUS projects, including the cost accumulation of expenditures associated with IUSD projects, there is an increased risk of misstatements to VA’s Property, Plant, and Equipment (PP&E) balance on the Balance Sheet and associated amortization expense on VA’s Statement of Net Cost.

VA did not comply with the accounting and financial reporting requirements of SFFAS No. 10, required for capital costs accumulated for the EHRM Project. General PP&E, as presented on the Balance Sheet, required a correcting entry of approximately \$4.6 billion to properly report VA's IUS and IUSD as of September 30, 2025.

Recommendations: Kearney recommends that VA perform the following:

1. Coordinate and collaborate with OEHRM to establish appropriate internal control activities to properly track and accumulate costs of the EHRM Project as IUSD. While a costing methodology was established in FY 2025 to estimate capitalizable costs to date, VA should develop a process to ensure EHRM costs are properly capitalized on a timely basis going forward.
2. Ensure the EHRM Project is fully set up within VA's accounting system and internal control environment as a capital asset acquisition. Specifically, VA should subject the EHRM Project to the following established internal control activities in place for other IUSD projects:
 - a. Project initiation and set-up, to include all applicable contracts and associated obligations for the EHRM Project.
 - b. WIP cost accumulation.
 - c. Quarterly WIP reconciliations.
 - d. Project close-out and capitalization procedures.
3. Establish, through collaboration with OEHRM and the Office of Finance, a formalized methodology and approach for transferring the EHRM Project from IUSD to IUS. Given the size and magnitude of the EHRM Project, which includes a multi-year deployment and operational schedule, an assessment of when and how to begin amortization for fully operational sites is necessary.
4. Leveraging the existing IT/Non-IT Workgroup, chaired by OIT, perform an Enterprise-wide assessment to evaluate and validate program office procurement authority for IT equipment, software, and software in development projects. The following should be among the Workgroup's immediate objectives:
 - a. While the OIT is the primary office for such procurements, an assessment is needed to validate the completeness of VA's reported IUS and IUSD asset portfolio.
 - b. A formalized data call process should be established to reduce the risk of IUS and IUSD projects being procured and undetected for financial reporting purposes.

* * * *

Significant Deficiencies

III. Loan Guarantee Liability (*Repeat Condition*)

Background: The Department of Veterans Affairs' (VA) Home Loan Guaranty (LGY) Program provides a guaranty to commercial lenders against losses from veterans' mortgage loan foreclosures/defaults. The Federal Credit Reform Act of 1990 (FCRA) and the Statement of Federal Financial Accounting Standards (SFFAS) No. 2, *Accounting for Direct Loans and Loan Guarantees*, require the costs of direct loans and loan guarantees to be estimated at net present value. The Veterans Benefits Administration (VBA) uses Excel-based, econometric models to estimate future net cash flows to be paid by VA over the life of the loans and determine the cost of these guarantees on a present value basis for budgetary and financial reporting purposes. VBA's Office of Financial Management (OFM), headed by VBA's Chief Financial Officer (CFO), is responsible for preparing the Liability for Loan Guarantee (LLG) estimate and maintaining the models. The Actuarial Liability Governance Board (ALGB) is charged with standardizing the actuarial model decision-making process and performing various responsibilities, including overseeing and approving VA's actuarial and benefit liabilities models.

The Fractional Logistic Regression Model (FLRM) (formerly known as Variable Default Model [VDM]) is a regression-based model using historical data on defaults and economic indicators to develop a default rate forecast. The Cash Flow Model applies the default rate forecast from the FLRM to loan volume data and calculates dollar amounts relating to recoveries and property expenses to project future cash flows of loan cohorts by policy year. The outputs from the model are discounted to their present value using the Office of Management and Budget's (OMB) Credit Subsidy Calculator (CSC) discounting tool to calculate budgeted and re-estimated subsidy rates and costs for each loan cohort. The discounted future cash flows are used to estimate the LLG reported within VA's financial statements. Ultimately, these models produce an estimate, reported as LLG within the Balance Sheet.

The Veteran Affairs Servicing Purchase Program (VASP) was retired in May 2025. Loans which were already enrolled or applied in VASP as of April 30, 2025 will not be affected by the retirement of the program. VA has revised the models to react to the retirement of VASP.

Conditions: VA's underlying estimation and modeling processes for producing the \$10.4 billion LLG reported within VA's financial statements did not sufficiently consider critical risk factors in developing the estimated liability to ensure the best available data was utilized at the time of producing the liability estimate. Additionally, VA did not adequately demonstrate that current modeling techniques in place for the liability estimate remain relevant and accurate through appropriate validation procedures. Specifically, audit procedures performed over the model and liability estimate identified the following areas which can be strengthened:

Critical Risk Factors for Default Cost Estimates: In analyzing borrower credit scores to determine whether credit scores should be considered as a variable for default loan estimates, VA aggregated credit score data to accommodate VA's cohort modeling framework. This

aggregation diminishes the variation of critical underwriting characteristics and weakens the causal relationship between credit scores and foreclosure probabilities. In addition, VA has not considered the value of collateral to loan balance or loan-to-value ratio (LTV) in their default cost estimates. Collateral to loan balance and LTV ratios are critical and relevant risk factors which VA did not consider in its estimate of the LLG.

Comparison and Evaluation of Alternative Models: VA utilizes a cohort- (i.e., aggregate) level model for estimating discounted future cash flows in developing the LLG for financial reporting purposes. While the cohort-level model is consistent with requirements set forth in SFFAS No. 2, VA has not sufficiently demonstrated that its cohort-level modeling approach remains appropriate as compared to more sophisticated approaches to estimation. Loan-level modeling, as an example, is an alternative and more current method which could be used for determining reestimates of credit subsidies. In fiscal year (FY) 2025, VA stated analyses were performed to compare its loan-level model with its cohort-level model; however, the results of the analysis were not provided for review during the audit process.

Defined Policies over Model Validation and Verification, including Lookback Analysis: VA did not sufficiently justify the methodology used for making adjustments within the model for estimated foreclosure rates of cohorts for FY 2020 and beyond. VA's methodology was to assign a baseline foreclosure rate, as calculated between FYs 2005 to 2019, to cohorts for FY 2020 and beyond. While estimated foreclosure rate adjustments were necessary, given the Coronavirus Disease 2019 (COVID-19)-era loss mitigation programs established, the timeframe (i.e., FYs 2005 to 2019) selected can have a substantial impact on the LLG, and VA did not adequately justify that the selected timeframe was the most appropriate for the estimation.

Cause: VA analyzes its LGY model on an annual basis to determine if enhancements are needed, including exploring alternatives within the cohort framework. While VA agreed that certain critical risk factors are not included within the FLM, VA determined that exclusion of such factors did not lead to a material design flaw within the model. VA's determination, however, was made by averaging factors (e.g., credit scores, LTV, and debt to income) across cohorts, which can result in inaccuracies based on smoothing out the variation among loans.

VA has not performed an appropriate risk assessment of its existing model and estimation processes for financial reporting purposes to fully support that the cohort-level model provides the best available data for accurately estimating the LLG. VA management has elected to maintain its use of the cohort-level model, stating there is no legal or financial accounting standard requirement to create a loan-level model. Additionally, since the cohort-level model is used for budgetary purposes, VA has aligned the same model for financial reporting.

VA has not established a sufficient approach to properly inform the selection of a lookback period for adjusting the estimated foreclosure rates of the post-2019 cohorts. Additionally, for critical risk factors considered for the model, VA has not implemented an appropriate review and approval process to ensure inclusion or exclusion is supported.

Effect: Without rigorous and robust analysis of critical risk factors and assumptions, in addition to complete and comprehensive model documentation with periodic model validation and lookback, the risk of misstatement and management bias remains high for VA's LLG estimate.

Recommendations: Kearney & Company, P.C. (Kearney) recommends that VA perform the following:

1. Develop and document a policy for monitoring controls over model validation and verification, to include, but not be limited to, defined roles and responsibilities, defined purpose and goals, scope, approach, schedules, types and extent of validation activities and tasks, frequency of validation, and specific actions that must be taken to complete individual validation activities and tasks.
2. Assess critical risk factors with appropriate methodologies for determining whether risk factors have a significant impact on the model estimation. In particular, VA should avoid aggregating the loan-level data for the purpose of risk factor analysis.
3. Formalize risk assessment procedures over the cohort-level modeling framework, to include a documented assessment of the framework compared to alternatives. The assessment should include management's determination and conclusions over the modeling framework that provides the best available data for estimating the LLG in VA's financial statements. The assessment should include:
 - a. A comprehensive and in-depth comparison between loan-level and cohort-level models and determine the optimal model to be used.
 - b. Exploration of alternative model-based approaches (e.g., loan-level model) that have proper sensitivities to loan characteristics for estimating foreclosure rates.
4. Develop monitoring mechanism(s) and compensating control(s) for the existing cohort-level model to support whether any model calibration is required in observation of fluctuating economic conditions in the forecasting horizon.

IV. Service Organization Monitoring and Complementary User Entity Controls (New Condition)

Background: VA uses service organizations for a multitude of significant transaction classes, including Medical Community Care expenditures, Loans Receivable, Payroll, and Investments. Service organizations undergo an annual examination to assess the design and operating effectiveness of internal controls which may be relevant to user entities. On an annual basis, upon completion of the annual examinations by Independent Public Accountants (IPA), Statement on Standards for Attestation Engagements (SSAE) No. 18 System and Organization Controls (SOC) 1®, Type 2 reports are made available to user entities (e.g., VA). To place reliance on the internal control environment of the service organizations, user entities need to design and implement certain Complementary User Entity Controls (CUEC) to achieve control objectives identified in the SOC report.

In accordance with the Government Accountability Office's (GAO) *Standards for Internal Control in the Federal Government* (Green Book), VA is responsible for establishing policy and procedures for obtaining and reviewing annual SOC reports, assessing the reports for risks

associated with relevant findings, identifying CUECs within the reports that are the responsibility of VA to implement, and monitoring and assessing the implementation and effectiveness of CUECs established by VA.

Conditions: VA did not establish a consistent or effective monitoring program for service organizations relied upon for internal controls over significant accounting cycles and transaction classes. Specifically, VA's review of SOC reports was either not completed, not fully documented, or only partially completed. Review of the monitoring procedures performed by VA identified the following issues:

Loans Receivable: VBA relies on a service organization for loan servicing, default services, and asset management for its acquired loan portfolio. VA reported over \$10 billion in loans receivable as of September 30, 2025. VBA's review of the service organization SOC report did not include sufficient detail to demonstrate how VA monitored its service organization, reviewed the associated SOC report, or considered if relevant controls are in place within VA's LGY Service or across VA to address CUECs identified in the SOC report.

Payroll: VA relies on a service organization for payroll services. VA reported over \$73 billion in payroll expenses in FY 2025. VA's review performed over the service organization SOC report was not comprehensive or effective, as it did not consider subservice organizations that are relevant to the scope of the examination.

Investments: VBA relies on a service organization for the processing of investment transactions, including issuing, servicing, and redeeming investment securities. VA reported over \$6 billion in investments as of September 30, 2025. VBA's review of the service organization SOC report was not comprehensive or effective, as it omitted key areas, such as: 1) type of report available; 2) timeframe of the report; 3) opinion of the SOC report and opinion date; 4) scope of the SOC report; 5) scope exclusions (with documentation of any exclusions noted and consideration of relevance to VA/VBA); and 6) results of the individual control objectives. In addition, the SOC report review template used by VBA was inconsistent with the template used by other VA offices, missing key areas such as assessing and mapping of CUECs to VA controls.

Additionally, VA did not appropriately design, implement, monitor, or assess controls to implement required CUECs, as identified within relevant SOC reports. For some of its critical service organizations, VA either did not perform an effective CUEC mapping to VA internal controls or could not link all CUECs to effective VA controls. In cases where VA did map CUECs to VA internal controls, the VA internal controls were not formally documented or tested, which is necessary to meet control objectives in the SOC reports. Insufficient CUEC mapping or implementation was identified for the three service organizations above, as well as for VA's Community Care Network (CCN) contractors. CCN contractors are relied upon by VA for claims administration and processing. VA reported over \$22 billion in expenses associated with Community Care for the period ended September 30, 2025.

Cause: VA has not designed, implemented, and/or enforced Enterprise-wide service organization monitoring policies and procedures, with consistent guidance/oversight and

appropriate monitoring to ensure reviews occur. While the Veterans Health Administration (VHA) provided comprehensive monitoring policies and procedures, the Office of Management (OM) and VBA did not. As of September 15, 2025, the Veterans Affairs Central Office (VACO) was working with its policy team to update VA's SOC review policy to incorporate the evaluation of subservice organization relationships.

In some cases, SOC review templates were thorough and effectively designed for appropriate monitoring; however, the use of the templates and the effectiveness of the reviews completed were inconsistent. Additionally, not all SOC reviews were performed with a standard template, creating inconsistency in how SOC reports were assessed.

Additionally, VA has not effectively conducted risk assessments over business processes and information systems where service organizations are relied upon; these risk assessments are intended to identify internal controls necessary to satisfy CUECs prescribed within the SOC reports. In some cases, where VA internal controls have been mapped to CUECs, such controls have not been assessed for effectiveness of design and/or operation.

Effect: Without the effective design and implementation of an Enterprise-wide service organization monitoring program, VA cannot meet requirements to effectively understand service organization internal controls, nor how the service organization's overall system of internal control impacts VA's internal control environment. Further, ineffective SOC report monitoring impedes VA's ability to appropriately identify controls to address the CUECs which may be necessary to achieve the service organization's control objectives.

Failure to fully implement CUECs may result in internal control weaknesses that are overlooked across VA, along with non-achievement of the related control objectives(s), thus increasing the risk of inaccurate financial reporting and unauthorized disclosure and modification to the system and data. Without proper oversight and monitoring of CUEC implementation and testing, there is an increased risk that the service organization's internal controls may not achieve their objectives, limiting VA's ability to rely on the service organization's internal controls and processes.

Recommendations: Kearney recommends that VA perform the following:

1. In collaboration with VHA, VBA, OM, and other program offices, as applicable, establish Enterprise-wide policy for baseline service organization monitoring procedures.
2. Distribute standardized SOC review templates for use across VA to promote consistency in the minimum monitoring requirements for SOC reports.
3. Monitor the effective implementation of the Enterprise-wide policy as part of VA's OMB Circular A-123 program to validate that SOC report reviews are conducted timely and effectively.
4. Prioritize risk assessments to identify VA internal controls which address relevant SOC report CUECs and to identify where internal controls do not exist which are necessary for SOC report CUECs.

5. Until VA's CUEC-related controls are deemed to be effectively designed and operational, conduct an assessment to identify where reliance on service organizations is not appropriate and determine if any immediate mitigation is necessary.
6. Monitor VA's CUEC-related controls on an annual basis as part of VA's OMB Circular A-123 program and perform tests of design and operating effectiveness on a recurring basis.

V. Medical Service Revenue and Accounts Receivable (*New Condition*)

Background: VA, through VHA, provides preventive care services, outpatient and inpatient diagnostic and treatment services, and pharmaceuticals associated with health care services. VA is authorized to bill insurance companies for health care provided to Veterans for non-service connected (NSC) treatment who have private health insurance coverage (referred to as third-party billings) and to collect copayments from Veterans based on their income, disability rating, or specialty eligibility factors (referred to as first-party billings). Medical billings and collections occur through the joint efforts of VA Medical Centers (VAMC) and regional Consolidated Patient Account Centers (CPAC).

The VAMCs are responsible for all patient-focused operations, including gathering eligibility and insurance information, providing medical care, and performing medical coding to support subsequent billings. The CPACs perform “back-end” revenue operations, including, but not limited to, insurance verification, bill creation, collections, and account management. VA uses the Veteran Information Systems and Technology Architecture (VistA) system for medical billing activities; it also serves as the subsidiary ledger for revenue and Accounts Receivable (AR) transactions that support amounts recorded in VA’s general ledger (GL), the Financial Management System (FMS).

In order to comply with the accrual basis of accounting prescribed by the Federal Accounting Standards Advisory Board (FASAB), summary-level AR entries are recorded within FMS on a monthly basis from VistA to reflect the current status of open AR balances via the AR Data Collector (ARDC) file. The end-of-month ARDC entry is reversed on the first business day of the following month. Throughout the month, summary-level collections from billings are recorded in FMS. Monthly, CPAC personnel reconcile prior-month activity in VistA to FMS, ensuring data is in balance between the two systems for each VAMC. In addition, to properly account for medical service revenue which has not yet been billed, CPACs record a monthly unbilled accrual, utilizing average daily billings, as well as an estimated number of days between a medical encounter and the generation of the associated bill.

The Federal Managers’ Financial Integrity Act of 1982 (FMFIA) requires VA to establish policies, procedures, and internal controls to ensure AR, revenue, and collections associated with medical services are completely and accurately recorded, reconciled, and reported within VA’s financial statements.

Condition: VA does not have a process in place to reconcile medical service revenue recorded in the FMS GL to the underlying billing and collection transaction-level details recorded in the VistA subsidiary ledger. While the monthly AR reconciliation performed by the CPACs examines VAMC-level billings and reconciles to the FMS trial balance, VA does not have internal controls or processes to reconcile recorded medical revenue from the GL to underlying AR billing and collection activity to demonstrate whether recorded revenue accurately reflects services provided during the reporting period.

VA has not performed a sufficient and appropriate validation of the monthly unbilled accrual methodology to accurately record revenue and AR. The average “days to bill” calculated by VA for the accrual methodology was based on a lookback of four months and resulted in average “days to bill” of 60 days. The results of sample-based billing testwork, as well as analysis of the FY 2025 billing population, identified average “days to bill” of approximately 170 days, which includes Community Care billing delays.

Cause: VA’s use of a legacy information system environment to manage and account for revenue and AR operations for medical services, namely VistA and FMS, requires an accounting posting methodology that is not compliant with United States Standard General Ledger (USSGL) requirements at the transaction level. VA’s posting methodology involves a monthly summary-level accrual and reversal in FMS to properly reflect the status of open AR across VAMCs. In addition, VA records summary-level revenue entries in FMS when cash is received for medical billings. This summary-level GL posting methodology hinders VA’s ability to effectively design internal controls to reconcile GL activity to underlying transactional details residing in VistA.

VA did not conduct an effective risk assessment process over medical service business processes and operations to appropriately mitigate financial reporting risks associated with revenue recognition. Specifically, VA did not consider reconciliation procedures necessary to verify that recorded revenue in the GL accurately reflects services performed during the reporting period, as supported by underlying transactional activity in the VistA subsidiary ledger.

VA did not design and implement an effective lookback analysis to validate the unbilled accrual methodology in place to account for medical services provided which have not yet been billed. VA’s use of a four-month lookback was insufficient to adequately estimate a billing time lag. Additionally, VA did not consider whether medical billing categories (e.g., first-party, third-party) should have independent time lag calculations. VA blended all billing categories without appropriate analysis to support if that was a reasonable estimation methodology.

Effect: Without appropriately designed and implemented internal control procedures to reconcile revenue within the GL to underlying transactional activity in the subsidiary ledger, VA cannot assert to the accuracy and completeness of reported AR and revenue associated with medical services. This increases the risk of misstatement associated with AR as reported on the Balance Sheet, as well as revenue recorded on the Statement of Net Cost.

An insufficient lookback analysis for the unbilled accrual can result in misstatements to AR and revenue. As a result of its outdated methodology, VA's accrual for unbilled claims was inaccurate. This included an overstatement of \$1.8 billion arising from revenue recorded in the current year but associated with services provided in prior years that were not accrued at the time of service. This also included an understatement of \$1.6 billion for unbilled claims as of September 30, 2025. Net, VA's AR and Earned Revenue were overstated by approximately \$200 million as of and for the period ended September 30, 2025.

Recommendations: Kearney recommends that VA perform the following:

1. As part of VA's ongoing system modernization efforts for VistA and FMS, provide recurring briefings on the effects of the financial reporting risks identified over medical service business operations. Ensure briefing audience includes appropriate stakeholder groups across VA (e.g., VHA, Office of Information Technology [OIT], VACO), including those responsible for the modernization efforts. Additionally:
 - a. An assessment should be undertaken to validate that the risks of current business processes and missing internal control activities in the current information system environment will not be replicated in the modernized information system environment, to the extent practical.
 - b. The accounting posting logic for medical service revenue in the modernized environment should allow for USSGL compliance at the transaction level.
2. Conduct a risk assessment for medical service operations to appropriately identify and respond to financial reporting risks which may have previously been undetected.
3. Develop and implement a periodic reconciliation of AR and revenue, as reported within the VA GL system, back to underlying transactional activity reflected in the subsidiary system. As part of developing the reconciliation internal control, VA should:
 - a. Conduct an assessment of medical service financial data needed for the periodic reconciliation.
 - b. Define roles and responsibilities of personnel responsible for preparing the reconciliation and reviewing/approving the reconciliation.
 - c. Establish variance resolution procedures for variances identified as part of the reconciliation design.
4. Monitor the implementation of the newly designed reconciliation procedures as part of VA's OMB Circular A-123 program.
5. Refine the medical service unbilled accrual methodology by strengthening the sufficiency and appropriateness of the "days to bill" time lag through a more robust lookback analysis. The methodology should include:
 - a. Lookback procedures that are expanded from four months to a minimum of 12 months.
 - b. An assessment to determine if blended time lags are appropriate across billing categories or if individual time lags should be calculated.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH LAWS, REGULATIONS, CONTRACTS, AND GRANT AGREEMENTS

To the Secretary, Chief Financial Officer, and Inspector General of the Department of Veterans Affairs

We have audited, in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 24-02, *Audit Requirements for Federal Financial Statements*, the financial statements, and the related notes to the financial statements of the Department of Veterans Affairs (VA) as of and for the year ended September 30, 2025, which collectively comprise VA's financial statements, and we have issued our report thereon dated January 16, 2026.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether VA's financial statements are free from material misstatement, we performed tests of VA's compliance with certain provisions of applicable laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of the financial statement amounts and disclosures, including the provisions referred to in Section 803(a) of the Federal Financial Management Improvement Act of 1996 (FFMIA). However, providing an opinion on compliance with those provisions was not an objective of our audit; accordingly, we do not express such an opinion. The results of our tests, exclusive of those referred to in FFMIA, disclosed an instance of noncompliance that is required to be reported under *Government Auditing Standards* and OMB Bulletin No. 24-02, which is described in the accompanying **Schedule of Findings** as Item II.

The results of our tests of compliance with FFMIA disclosed VA's financial management systems did not comply substantially with Section 803(a) requirements related to Federal financial management system requirements or the application of the United States Standard General Ledger at the transaction level, as described in the accompanying **Schedule of Findings** as Item I.

Department of Veterans Affairs' Response to Findings

Government Auditing Standards requires the auditor to perform limited procedures on VA's response to the findings identified in our audit. VA's response is described in a separate memorandum attached to this report in the "Financial Section" of the Agency Financial Report. VA concurred with the findings identified in our engagement. VA's response was not subjected to the other auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on the response.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of compliance with certain provisions of applicable laws, regulations, contracts, and grant agreements and the results of that testing, and not to provide an opinion on VA's compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* and OMB Bulletin No. 24-02 in considering VA's compliance. Accordingly, this report is not suitable for any other purpose.

January 16, 2026

Schedule of Findings

Noncompliance and Other Matters

I. Federal Financial Management Improvement Act of 1996 Noncompliance (*Repeat Condition*)

The Federal Financial Management Improvement Act of 1996 (FFMIA) was enacted to improve the quality, consistency, and reliability of Federal financial management by requiring agencies to implement and maintain financial management systems that substantially comply with the following three Section 803(a) requirements:

- Federal financial management system requirements
- Applicable Federal accounting standards
- United States Standard General Ledger (USSGL) at the transaction level.

During fiscal year (FY) 2025, the Department of Veterans Affairs (VA) relied on a complex, interconnected set of general ledger (GL) and feeder systems in order to generate complete and accurate financial statements. Many of these systems were in the process of being decommissioned and replaced, including VA's primary GL, the Financial Management System (FMS), which was deployed in 1992. While VA has initiated efforts to transition to the Integrated Financial and Acquisition Management System (iFAMS), full migration has not yet been completed. As of September 30, 2025, VA's financial management systems did not substantially comply with the requirements within FFMIA, as asserted by VA in the "Management Assurances" section of the Agency Financial Report and as discussed below.

Federal Financial Management Systems Requirements

FFMIA requires timely and reliable financial reporting, including consistently, completely, and accurately recording and accounting for financial information, maintaining internal control over financial reporting and financial system security. The internal control matters described in Items I, II and V, regarding Information Technology, Internal Use Software, and Medical Service Revenue and Accounts Receivable, in the **Schedule of Findings** in our *Report on Internal Control over Financial Reporting* constitute noncompliance with FFMIA Federal financial management system requirements.

FFMIA requires financial management system owners to implement and monitor Federal information system security controls to minimize the risk to the confidentiality, integrity, and availability of the systems and data. The primary framework for these controls is defined in National Institute of Standards and Technology (NIST) Special Publication (SP) 800-53, Revision (Rev.) 5, *Security and Privacy Controls for Information Systems and Organizations*. The design and operating effectiveness of VA's information system security controls did not adhere to NIST SP 800-53, Rev.5, as discussed in the **Schedule of Findings** under Item I in our *Report on Internal Control over Financial Reporting*. Weaknesses were identified in VA's

access controls, configuration management, vulnerability management, and security management, which represent noncompliance with information security requirements.

Standard General Ledger at the Transaction Level

FFMIA requires that financial events be recorded in accordance with USSGL guidance in the Treasury Financial Manual (TFM). VA's financial management systems failed to meet the USSGL requirements set forth in FFMIA Section 803(a) in the following ways:

- **Six-Digit USSGL Reporting:** VA's FMS did not meet the six-digit USSGL account structure required by the TFM. FMS trial balances (TB) had to be converted to a USSGL-compliant structure in the Management Information Exchange (MinX) system prior to external reporting
- **FMS Account Attributes:** FMS did not capture critical attributes, such as exchange/non-exchange indicator or Federal/non-Federal indicator, as required per the TFM. In order to facilitate attribute-level reporting, FMS included additional GL accounts to classify its activity
- **Prior-Year Recoveries:** FMS did not properly distinguish upward or downward adjustments to prior-year obligations from current-year activities. VA relied upon a tool to reclassify activity into the proper account to ensure accurate financial reporting. As a result, VA did not have transaction-level accounting for its upward and downward adjustments
- **Subsidiary/Feeder System Limitations:** VA used various feeder systems to record financial activity. Both the Enterprise Management of Payment Workflow and Reporting (eMPWR) and Insurance General Ledger (IGL), key benefit systems, included limitations that resulted in improper or insufficient accounting. eMPWR did not include account attributes required by the TFM. IGL did not result in USSGL-compliant revenue accounting
- **Subsidiary Ledger to General Ledger System Reconciliations:** VA's use of a legacy information system environment to manage and account for revenue and Accounts Receivable (AR) operations for Medical Services, namely Veteran Information Systems and Technology Architecture (VistA) and FMS, required an accounting methodology that was not compliant with USSGL requirements at the transaction level. VA did not have a process in place to reconcile Medical Service revenue recorded in the FMS GL to the underlying billing and collection transaction-level details recorded in the VistA subsidiary ledger. For additional details, refer to Item V within the **Schedule of Findings** in our *Report on Internal Control over Financial Reporting*.

Noncompliance with the USSGL requirements also represents FFMIA noncompliance with Federal financial management system requirements established by the Office of Management and Budget (OMB) and the Department of the Treasury (Treasury).

VA's continued dependence on FMS and noncompliant feeder systems heightened the risk of reporting errors, incorrect application of USSGL requirements, and operational inefficiencies that ultimately drove substantial FFMIA noncompliance. As a result of the FFMIA

noncompliance, as described above, VA management performed large-dollar, manual journal voucher (JV) adjustments in both FMS and MinX in order to generate complete and accurate financial statements.

II. Federal Managers' Financial Integrity Act of 1982 Noncompliance (*Repeat Condition*)

The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires Executive agency reporting entities to establish and implement administrative and accounting controls in accordance with the standards prescribed by the Comptroller General of the United States. Accordingly, the Comptroller General of the United States published the Government Accountability Office's (GAO) *Standards for Internal Control in the Federal Government* (Green Book) to define the requirements for effective internal control for Federal agencies. Additionally, OMB developed Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*, to establish specific requirements for agencies to integrate risk management and internal control functions and an assessment process based on the requirements within the Green Book.

The above standards provide the internal control framework and criteria Federal managers must use when designing, implementing, and operating an effective system of internal control. Moreover, these standards require management to develop documentation of the entity's system of internal control to demonstrate that components of internal control are operating in an integrated manner. VA is responsible for establishing an effective system of internal control to help ensure management's financial reporting, operational, and compliance objectives are achieved.

Although VA had well-documented business processes that are subject to recurring monitoring through the agency's A-123 program, the material weaknesses and significant deficiencies reported in the accompanying *Report on Internal Control over Financial Reporting* indicated VA had not established an effective system of internal control, as required.

In addition, as provided in the "Management Assurances" section of the Agency Financial Report, VA management was unable to provide reasonable assurance that VA's system of internal controls was effective and achieving its intended objectives in accordance with FMFIA §2, *Effectiveness of Internal Control over Financial Reporting*, and FMFIA §4, *Conformance with Federal Financial Management System Requirements*.

Agency Comments

- Message from VA's Secretary
- Message from VA's Chief Financial Officer

MESSAGE FROM VA'S SECRETARY

THE SECRETARY OF VETERANS AFFAIRS
WASHINGTON

January 16, 2026

When President Trump nominated me to be Secretary of the United States Department of Veterans Affairs (VA or the Department), he provided a very clear charge. He said, "I want you to take great care of our Veterans." In the first year of this Administration, I am proud to report that VA is implementing key reforms towards fulfilling the mission President Trump presented to me. VA's fiscal year (FY) 2025 Agency Financial Report (AFR) reflects our commitment to fiscal transparency and responsibility as we transition to my Veterans First strategy. Too often in the past, VA wasted taxpayer dollars on non-mission-critical programs. Those days are over. Today at VA, the Veteran is at the center of everything we do. The Veteran is the mission.

Part of putting Veterans first is finding new and better ways to do our jobs and focus our resources. VA reduced total staff by 30,000 in FY 2025. By eliminating layers of bureaucracy, we can improve our service delivery to Veterans. We have eliminated divisive Diversity, Equity, and Inclusion policies saving \$14 million in taxpayer funding. Through the cancellation of wasteful contracts, grants, and leases, VA redirected \$900 million away from programs and initiatives that do not directly benefit the Veterans we are privileged to serve.

By all measures, VA's FY 2025 was historic. We reached an all-time high of over 3 million disability rating claims issued. The backlog of Veterans waiting for VA benefits dropped by 43%. We improved our physical footprint by opening 16 new health care clinics across the country and invested over \$800 million in infrastructure improvements to ensure VA facilities are safe and provide state-of-the-art patient care. We also delivered earned care and benefits quicker and easier than ever before. We made major reforms in how eligible survivors and dependents of deceased Veterans and Service members apply for, and receive, VA benefits and services. We eliminated barriers for VA-enrolled Veterans to access care from non-VA providers at the Department's expense. And finally, VA offered Veterans nearly 1 million appointments outside of normal operating hours, giving Veterans more timely and convenient options for care that fits VA into their lives, rather than the other way around.

Amid all this progress on behalf of Veterans, I am pleased to announce that the Department received its 27th consecutive unmodified audit opinion from the independent public accounting firm, Kearney & Company, for the FY 2025 financial statement audit. This audit signifies that VA's financial statements are fairly presented in all material respects and demonstrates our commitment to transparency and exceptional fiscal stewardship. We remain focused on addressing any material weaknesses, significant deficiencies, and noncompliance identified, with detailed remediation efforts outlined in the Management's Statement of Assurance on page 17 of this AFR.

However, our work is far from finished. I look forward to working with our dedicated VA staff and external partners to continue making historic reforms refocusing the Department on its core mission: providing the best possible care and services to Veterans, families, caregivers, and survivors.

Sincerely,

(/s/) Douglas A. Collins

MESSAGE FROM VA'S CHIEF FINANCIAL OFFICER

DEPARTMENT OF VETERANS AFFAIRS

ASSISTANT SECRETARY FOR MANAGEMENT

WASHINGTON DC 20420

January 16, 2026

Fiscal year (FY) 2025 marked my first year serving as the Department of Veterans Affairs (VA or the Department) Assistant Secretary for Management and Chief Financial Officer (CFO). As a Veteran, I am proud to join the VA. I am committed to the Department's mission of providing world-class health care and benefits to our Nation's Veterans and their families. In FY 2025, Congress appropriated \$401 billion for VA, an increase of \$66 billion over FY 2024. This 20% increase enables VA to carry out President Trump's commitment to Veterans, including enhancing the delivery and quality of services provided.

This year, VA recommitted to the deployment of our long-overdue Integrated Financial and Acquisition Management System (iFAMS). Although we implemented the system at the Veterans Benefits Administration Loan Guaranty program in May 2025, and at the Veterans Health Administration Central Office in June 2025, significant work remains to be done. I am committed to reducing the cost and complexity of iFAMS delivery, and to fully completing the system's implementation within 36 months. Full deployment of iFAMS is crucial to modernizing VA's financial infrastructure and ensuring the accuracy of our financial reporting.

Additionally, VA's efforts to combat fraud, waste, and abuse continued to be a top priority as VA works to be good stewards of taxpayer dollars. To support this priority, Executive Order 14247, *Modernizing Payments To and From America's Bank Account*, directed the elimination of paper check payments, which are more susceptible to fraud. Through our outreach, more than 600,000 previously unbanked Veterans are now enrolled in direct deposit, ensuring timely and secure access to their benefits while reducing fraud vulnerabilities.

In FY 2025, VA terminated 585 non-mission-critical or duplicative contracts. The termination of these contracts eliminated government waste and helped VA redirect \$900 million towards our core mission: providing the best possible care and services to Veterans, their families, caregivers, and survivors. Through normal attrition, the Deferred Resignation Program, Voluntary Early Retirement Authority, and the Federal hiring freeze, the Department reduced total VA staff by approximately 30,000 employees to improve operational efficiency. Be assured, we have implemented multiple safeguards to ensure these reductions have no impact on Veteran care, benefits, or services.

This year, VA transitioned to a new independent public accounting firm, Kearney & Company, for our financial statement audit. The team worked hard to deliver the Department's 27th consecutive unmodified ("clean") audit opinion for the FY 2025 financial statement audit. The auditors identified two material weaknesses related to information technology internal controls and internal use software, and three significant deficiencies related to the loan guarantee liability; service organization monitoring; and medical service revenue and accounts receivable. We concur with their findings and recommendations. Our remediation efforts are detailed in the Management's Statement of Assurance on page 17.

I extend my sincere gratitude to the financial community within VA. Thank you for all you do to serve our Nation's Veterans. I share your passion for our mission, and I am confident that with your continued commitment we will make strides in the year ahead.

Sincerely,

(/s/) Richard F. Topping

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1. REPORTING ENTITY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. ORGANIZATION

VA was created as an independent agency on July 21, 1930, and was elevated to a cabinet department of the Executive Branch of the Government on March 15, 1989. The Department is organized under the Secretary, whose office includes a Deputy Secretary and a Chief of Staff. The Secretary has direct lines of authority over the Under Secretary for Health, the Under Secretary for Benefits, the Under Secretary for Memorial Affairs, and the Chairman of the Board of Veterans' Appeals. In addition, a General Counsel, an Executive Director, a Chief Officer and seven Assistant Secretaries support the Deputy Secretary. The OIG provides oversight of financial and operating activity.

B. REPORTING ENTITY

VA is a component of the U.S. Government. For this reason, some of the assets and liabilities reported by VA may be eliminated for Government-wide reporting because they are offset by assets and liabilities of another U.S. Government entity. These financial statements should be read with the realization that they are for a component of the U.S. Government.

All VA component activities are included in VA's Consolidated Financial Statements and the Combined Statement of Budgetary Resources. The consolidated financial statements meet the requirements of the CFO Act of 1990 and the Government Management Reform Act of 1994. The principal financial statements report the financial position and results of operations of VA, pursuant to the requirements of 31 U.S.C. § 3515(b). VA interacts with and is dependent upon the financial activities of the Federal Government as a whole. Therefore, the results of all financial decisions reflected in these consolidated financial statements are not the sole decisions of VA as a stand-alone entity. VA's fiscal year-end is September 30.

SFFAS No. 47, *Reporting Entity*, requires information to be provided on disclosure entities and related parties. VA has relationships with many organizations from nonprofits to special interest groups that provide support to VA and advocacy for Veterans; however, none of VA's relationships are of such significance as to warrant separate or individual disclosure.

C. BASIS OF ACCOUNTING AND PRESENTATION

The principal financial statements are prepared in accordance with GAAP as promulgated by the Federal Accounting Standards Advisory Board (FASAB) and OMB Circular No. A-136, *Financial Reporting Requirements*, as revised.

The consolidated financial statements include the Balance Sheet, Statement of Net Cost, and Statement of Changes in Net Position (SCNP), which are prepared on an accrual basis of accounting. Transactions occurring among VA components are eliminated in the consolidated financial statements. The Statement of Budgetary Resources reflects the appropriation and consumption of budget and spending authority, and other budgetary resources before eliminations. The Statement of Budgetary Resources is not consolidated but combined; therefore, elimination of intra-entity transactions is not permitted.

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

VA receives goods and services from other Federal entities at no cost or at a cost less than the full cost to the providing Federal entity. Consistent with accounting standards, certain costs of the providing entity that are not fully reimbursed by VA are recognized as imputed costs in the Consolidated Statement of Net Cost and are offset by imputed financing sources in the Consolidated Statement of Changes in Net Position. Imputed costs and financing sources relate to business-type activities, employee benefits, and claims to be settled by the Treasury Judgment Fund. However, unreimbursed costs of goods and services other than those identified above are not included in our financial statements.

Accounting standards require all reporting entities to disclose that accounting standards allow certain presentations and disclosures to be modified, if needed, to prevent the disclosure of classified information.

D. BUDGETS AND BUDGETARY ACCOUNTING

Budgetary accounting measures the appropriation and consumption of budget authority or other budgetary resources and facilitates compliance with legal constraints and controls over the use of funds. Under budgetary reporting principles, budgetary resources are consumed at the time of purchase.

The Statement of Budgetary Resources reports Total Budgetary Resources, Status of Budgetary Resources, and Outlays. VA's budget authorities include Appropriations, Borrowing Authority, and Spending Authority from Offsetting Collections. Details by major accounts are shown in the Combining Statement of Budgetary Resources in the Required Supplementary Information (RSI) section.

See Note 22 for further disclosure on budgets and budgetary accounting.

E. REVENUES AND OTHER FINANCING RESOURCES

VA collects revenues for exchange and nonexchange activities. Exchange revenue is an inflow of resources to VA that is recognized when earned with other Federal agencies or the public where each party to the transaction sacrifices value and receives value in return. Exchange revenues are presented on the Statement of Net Cost and are discussed further in Note 20.

Nonexchange revenue is an inflow of resources to VA that is a specifically identifiable, legally enforceable claim to cash or other assets where VA does not give value directly in exchange for the inflow of the resources. It is recognized to the extent that collection is probable and the amount is measurable. Examples include voluntary donations or payments in the form of penalties. Nonexchange revenue is presented as Other Financing Sources on the Statement of Changes in Net Position and consists primarily of Imputed Financing, Donations and Forfeitures of Property, and Transfers In and Out of VA Without Reimbursement. Most of the transfers in and out are between VA funds.

F. TRANSFERRING BUDGET AUTHORITY TO OTHER AGENCIES

VA, as the transferring (parent) entity, is a party to allocation transfers with the Department of Defense (DoD), the transferee (child) entity. Generally, all financial activity related to these allocation transfers (for example, budget authority, obligations, and outlays) is reported in the financial statements of the parent entity from which the underlying legislative authority, appropriations, and budget apportionments are derived.

G. FUND BALANCE WITH TREASURY

Treasury performs cash management activities for all Federal Government agencies. The FBT represents VA's right to draw funds from the Treasury for allowable expenditures. The balances in Note 3 are reconciled to Treasury and primarily consist of trust, revolving, special, and appropriated funds.

H. INVESTMENTS

Investments are reported in Note 5 at cost, net of amortized premiums or discounts, and accrued interest, and are redeemable at any time for their original purchase price. Interest rates for Treasury special securities are initially set based on average market yields for comparable Treasury issues.

I. ACCOUNTS RECEIVABLE

In accordance with SFFAS No. 1, *Accounting for Selected Assets and Liabilities*, and Technical Bulletin 2020-1, *Loss Allowance for Intragovernmental Receivables*, accounts receivable are reported in Note 6 at net realizable value, measured as the carrying amount less an allowance for loss provision or contractual adjustment for medical care, as considered necessary. VA determines the allowance based on the contractual nature of the current balance due and historical experience with collections including a rolling 12-month analysis.

Contractual adjustments represent the difference between the billed amount and the amount the provider has agreed to accept. VA and its third-party providers contractually agree upon these pre-determined amounts. Contractual adjustments are typically based on reasonable charges for similar care or services as provided by other facilities in the same geographic area. This convention is consistent with SFFAS No. 7, *Accounting for Revenue and Other Financing Sources*, and 38 U.S.C. § 1729. See Note 1.E and Note 20.

Overpayments to Veterans or beneficiaries are the main cause of compensation, pension, and education receivables. Allowances on these receivables are determined based on historical experience with collection efforts during the prior fiscal year. Even though VA was previously authorized by 38 U.S.C. § 5315 (amendment 2022) to charge interest and administrative costs on benefit debts similar to charges levied on other debts owed to the Federal Government, VA has not charged interest and administrative fees for such programs. In FY 2023, Congress passed legislation within Omnibus Bill § 253, which prohibits VA from charging interest and administrative costs on a loan, loan guaranty, or loan insurance program; a disability compensation program; a pension program; and an education assistance program. As a result, VA does not charge such costs for new debts occurring on or after December 29, 2022, for the Veterans Benefits Administration's benefit programs.

J. LOANS RECEIVABLE, NET AND LOAN GUARANTEE LIABILITIES

Direct loan obligations and loan guarantee commitments made after FY 1991 are governed by the Federal Credit Reform Act of 1990 (Credit Reform Act or FCRA). Disclosures are in accordance with SFFAS No. 2, *Accounting for Direct Loans and Guarantees*; SFFAS No. 18, *Amendments to Accounting Standards for Direct Loans and Loan Guarantees*; and SFFAS No. 19, *Technical Amendments to Accounting Standards for Direct Loans and Loan Guarantees*. Under the Credit Reform Act, the present value of the estimated net cash flows paid by VA must be recognized as a subsidy cost in the year the loan is disbursed. Direct loans and guaranteed

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

loans receivable are reported net of an allowance for subsidy costs at present value, and loan guarantee liabilities are reported based on present value of future estimated cash flows.

Direct loans obligated before October 1, 1991, and any other non-Credit Reform Act direct loans and loan guarantees are not subject to the Credit Reform Act. Instead, these are recorded at the net realizable value given the remaining balance of amounts disbursed plus accrued and unpaid interest receivable. The allowance for loan losses on direct loans obligated before October 1, 1991, is recognized when it is more likely than not that the direct loans will not be totally collected. The allowance of the uncollectible amounts is re-estimated each year as of the date of the financial statements. Loan losses are re-estimated by program.

Risk factors are evaluated for each group of program loans within each year in which the loans are disbursed. Risk factors include historical loan experience, economic conditions, financial and relevant characteristics of borrowers, value of collateral to loan balance, changes in recoverable value of collateral, and new events that would affect the loans' performance. A systematic methodology based on an economic model is used to project default costs by risk category. VA specifically uses a statistical model that generates time period-specific loan guarantee commitment claims rates for the Loan Guarantee Program. Actual historical experience includes actual payments, late payments, defaults, recoveries, and amounts written off.

A loan modification is a Federal Government action, including new legislation or administrative action, that directly or indirectly alters the estimated subsidy cost and the present value of loan guarantees.

K. INVENTORY AND RELATED PROPERTY

Inventory and Related Property are comprised of inventory held for sale, operating materials, and supplies, along with stockpile materials, as reported in Note 8.

Inventory held for sale consists of retail store stock held for current sale by the Veterans Canteen Service (VCS). VCS provides retail merchandise, food, and vending services across the country. Inventory held for sale is recorded at cost using the weighted-average cost method and expensed when sold.

Operating materials and supplies consist of medical and pharmaceutical supplies held by the Supply Fund. Operating materials and supplies are recorded at cost and expensed when transferred to VAMCs, regional offices or cemeteries.

Stockpile materials are strategic and critical materials held in reserve for use in national defense, conservation, or national emergencies, per statutory requirements. Stockpile materials consist of caches of pharmaceuticals and medical supplies stored at designated treatment facilities. These materials are recorded at cost and expensed when used or issued for use.

L. PROPERTY, PLANT, AND EQUIPMENT

VA's PP&E consists of land, buildings, equipment, other structures, leasehold improvements, IUS, construction work-in-process (WIP), and right-to-use lease assets.

The three largest asset categories by net book value are:

- **Buildings** include structures used to support and operate one of the largest health care systems in the country. VA also owns buildings related to general operations and benefits delivery, including supportive housing and memorial services.
- **Construction WIP** represents the accumulated costs of ongoing major construction projects that are greater than \$30 million, minor construction projects that are \$30 million or less, and non-recurring maintenance. Such projects may include gravesite development and construction of new medical facilities.
- **IUS** includes software that is developed, purchased, or modified for internal needs and not intended for sale, lease, or external distribution. As an example, VA is implementing a modern electronic health record (EHR) system that enables seamless information sharing across VA, DoD, and community providers.

VA has a significant construction program for medical facilities and national cemeteries. Construction project costs are recorded in construction WIP accounts. Construction costs are recorded as construction WIP until the asset is placed in service. Costs for construction projects completed in multiple phases are recorded as construction WIP until the project phase is placed in service. Property not meeting the capitalization criteria is expensed. Buildings, equipment, other structures, leasehold improvements, and software projects are capitalized if the useful life is 2 years or more. Capitalized property is depreciated on a straight-line basis and recorded at net book value as reported in Note 9. There are no restrictions on the use or convertibility of PP&E.

Asset Category	Estimated Useful Life	Capitalization Threshold
Buildings	25 to 40 years	\$1 million
Equipment	5 to 20 years	\$1 million
Other Structures	2 to 40 years	\$1 million
Leasehold Improvements	2 to 40 years	\$1 million
IUS	Varies	\$1 million

VA capitalizes right-to-use lease assets for leases with annual shell rent that meets or exceeds \$4 million. Right-to-use lease assets are amortized over the life of the lease. See Note 1.S and Note 16 for further discussion.

IUS costs subject to capitalization are incurred during the software development phase. The capitalized costs are amortized in accordance with the planned lifecycle established during the software planning phase. The useful life of IUS is determined on a per-project basis, no less than 2 years, and consistent with the solution's longevity as limited by legal, regulatory, and/or contractual provisions.

Heritage Assets are properties that possess one or more of the following characteristics: historical or natural significance; cultural, educational, or aesthetic importance; or significant architectural characteristics. Accounting for historic Heritage Assets allows VA to meet its responsibilities under the National Historic Preservation Act (NHPA) to preserve Federally owned, administered, or controlled historic resources. VA's Heritage Asset inventory is reported in Note 10.

M. ADVANCES AND PREPAYMENTS

Intragovernmental advances consist primarily of payments to the U.S. Army Corps of Engineers for major construction projects. Other Than Intragovernmental Advances consist of payments to medical schools, grantees, and beneficiaries. Advances and prepayments are reduced as services are performed.

N. ACCOUNTS PAYABLE

Accounts Payable are amounts owed by VA for goods and services received. When VA accepts title to goods, whether the goods are delivered or in transit, or incurs costs for services received, VA recognizes a liability for the unpaid amount of the goods and services. If invoices for those goods and services are not available when the financial statements are prepared, the amounts owed are estimated.

Accounts Payable primarily consist of payables to Veterans such as scheduled payments for compensation, pension, and education benefits. Significant variances in Accounts Payable can occur from year to year depending on the timing of compensation and pension benefit payments.

Intragovernmental Accounts Payable consists of amounts owed to other Federal Government agencies, primarily to Department of Labor (DOL), Office of Personnel Management (OPM), and Department of Justice (DOJ). The remaining Accounts Payable consist of amounts due to the public.

O. LIFE INSURANCE BENEFITS

VA administers seven life insurance programs:

- (1) United States Government Life Insurance (USGLI);
- (2) National Service Life Insurance (NSLI);
- (3) Veterans Special Life Insurance (VSLI);
- (4) Veterans Reopened Insurance (VRI);
- (5) Service-Disabled Veterans Insurance (S-DVI) provides insurance to Veterans who receive a service-connected disability rating;
- (6) Veterans' Mortgage Life Insurance (VMLI) covers severely disabled Veterans, (VMLI is part of the Veterans' Insurance and Indemnities fund); and
- (7) Veterans Affairs Life Insurance (VALife) provides insurance to Veterans who have received a service-connected disability rating.

Note 17 discloses liabilities for VA's life insurance programs in accordance with SFFAS No. 51, *Insurance Programs*.

USGLI, NSLI, VSLI, and VRI were available to Veterans who served during World Wars I and II, Korean Conflict, and Vietnam War eras, and are now closed to new issues. The USGLI program does not have policyholders remaining in this program, but annuity payments continue to be made to beneficiaries. The NSLI, VSLI, VRI, and VALife programs are self-supporting through the collection of premiums, which are used to fund current operations. Interest income and the release of investment reserves are used to cover funding shortfalls in these programs. In addition, interest income from insurance policy loans may be used.

The S-DVI and VMLI programs are designed to provide insurance coverage to disabled Veterans at standard premium rates; these programs require annual appropriations as they are not self-supporting and have no assets for investments. The S-DVI program ceased issuing new policies after December 31, 2022.

In the NSLI, VSLI, VRI, and S-DVI programs, qualifying insureds who have incurred a disability that prevents them from engaging in substantially gainful employment can have the premiums on their policies waived.

The insurance reserves for USGLI, NSLI, VSLI, VRI, and VALife are reported as liabilities covered by budgetary resources, while part of the S-DVI and VMLI reserves are reported as liabilities not covered by budgetary resources. A downward trend in reserve liabilities for World War II and Korean War Era Veterans exists due to the declining numbers of policyholders.

The following table includes components of the Life Insurance Liability Reserves Computation:

Program	Type of Plan	Table Used	Interest Rate
USGLI	Award Installments Payable	1983 Society of Actuaries (SOA) Individual	2.00%
	After the Certain Period	Annuity Mortality Table - Female

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

Policies in three of the administered programs, NSLI, VSLI, and VRI, are eligible for dividends. The Secretary determines annually the excess funds available for dividend payment based on an actuarial analysis of each program's claims and investment experience, compared to the mortality and interest assumptions used in that program at the end of the preceding calendar year. Dividends are declared on a calendar-year basis and paid on policy anniversary dates. Policyholders can elect to receive a cash payment; prepay premiums; repay loans; purchase paid-up insurance; or deposit the amount in an interest-bearing account. In addition, insurance dividends that are left on credit or deposited with VA accrue interest at a rate that varies by fund relative to the fund's investment portfolio earnings. For FY 2025, the interest rates range from 2.50% to 1.00%.

The reserve for dividends payable is an estimate of the present value of dividends accrued as of the valuation date. VA records the portion of the estimated policy dividend that applies to the current reporting period as a dividend liability. The following discount rates along with an appropriate accrual factor were used to calculate the FY 2025 dividends by program: NSLI 2.50%; VSLI 3.50%; and VRI 2.50%.

The methodology employed by VA to estimate the dividend liability reflects expected dividends to be paid by quarter using percentages that are based on the actual distribution of dividend anniversaries at the end of the prior year.

In addition to the seven life insurance programs VA administers directly, VA supervises the following programs:

- (1) Servicemembers' Group Life Insurance Program (SGLI);
- (2) Veterans' Group Life Insurance Program (VGLI); and
- (3) Traumatic Injury Protection Program (TSGLI).

VA has a group policy with Prudential to administer these programs. These programs provide coverage to members of the uniformed armed services, reservists, and post-Vietnam Veterans and their families. All SGLI-insured Veterans are automatically covered under the TSGLI program, which provides insurance payments to Veterans who sustain a traumatic injury in service that results in a severe qualifying loss. SGLI and VGLI premiums are set by mutual agreement between VA and Prudential based on program experience.

VGLI premiums are paid by Veterans to Prudential directly. SGLI premiums are deducted from the Service member's pay by DoD's applicable Armed Services component. The Defense Finance and Accounting Service remits collected premiums to VA, which are then transmitted to Prudential. Prudential records the premiums for the VGLI and SGLI policies and maintains investments in their accounting records independent from VA. Prudential holds reserves needed for claims and administration while the group policy is in effect. Further, a contingency reserve is used to account for adverse fluctuations in future charges under the policy, as required by law.

Under 38 U.S.C. §§ 1971(e) and 1977(f), VA is responsible for assessing the contingency reserve balance held by Prudential. If and when the Secretary determines that the contingency reserve exceeds an adequate balance, Prudential will transfer the excess funds into VA's revolving fund. VA is then responsible for investing the excess funds in Treasury securities.

SGLI and VGLI insurance liabilities are recorded by Prudential, as the company assumes the risk of loss on these programs per the terms and conditions of the group policy; thus, the liabilities are not reflected on VA's Balance Sheet.

DoD pays for any TSGLI claim costs in excess of premiums collected from Service members in accordance with 38 U.S.C. § 1980A(e)(6) and (7). The Secretary determines the claim costs that are traceable to the extra hazards of duty in the uniformed services based on the excess mortality incurred by current and former SGLI-insured Service members above the expected mortality under peacetime conditions.

P. ANNUAL LEAVE

Federal employees' annual leave is accrued as it is earned, and the accrual is reduced annually for actual leave taken. Each year, the accrued annual leave balance is adjusted to reflect the latest pay rates for leave that has been earned but not taken. Sick and other types of nonvested leave are expensed as taken. To the extent appropriations are not available to fund annual leave earned but not used, funding will be obtained from future financing sources; therefore, these liabilities are not covered by budgetary resources and are reported as unfunded leave (reported in Note 13).

Q. VETERANS BENEFITS

The Veterans Benefits Liability for Compensation, Burial, Education, and VR&E (reported in Note 13) is recognized in accordance with SFFAS No. 5, *Accounting for Liabilities of the Federal Government*, and presented in accordance with SFFAS No. 33, *Pensions, Other Retirement Benefits, and Other Postemployment Benefits: Reporting the Gains and Losses from Changes in Assumptions and Selecting Discount Rates and Valuation Dates*.

SFFAS No. 33 requires the use of a yield curve based on marketable U.S. Treasury securities to determine the discount rates used to calculate actuarial liabilities for Federal financial statements. Historical experience is the basis for expectations on future trends in marketable U.S. Treasury securities. Effective for periods beginning after September 30, 2009, SFFAS No. 33 requires a minimum of five periodic rates for the yield curve input, consistency in the number of historical rates used from period to period and permits the use of a single average discount rate if the resulting present value is not materially different from what would be obtained using the yield curve.

The valuation discount rate is a schedule of interest rates, comprised of the annual yield that is equivalent to the spot rate for each maturity at 6-month intervals starting with 6 months through to the end of the projection horizon. The spot rates used are the average of the Treasury Nominal Coupon Issue Treasury Yield Curve Spot Rates that are promulgated two quarters prior to the valuation date. The spot rates are produced by Treasury's Office of Economic Policy.

COMPENSATION AND BURIAL

VA provides compensation benefits under 38 U.S.C. Chapters 11 and 13 to Veterans who are disabled by an injury or disease incurred or aggravated in active military service and to their survivors. Burial benefits are provided under 38 U.S.C. Chapters 23 and 24. These benefits are generally provided in recognition of a Veteran's military service. The liability for future compensation and burial payments is reported on the Balance Sheet at the present value of

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

expected future payments and is developed on an actuarial basis. Various assumptions in the actuarial model impact the liability, such as the total number of Veterans, estimated future military separations, the number of Veterans and dependents receiving payments, discount rates, COLA, presumptive service conditions resulting in disability benefits coverage, and life expectancy.

VA uses the census population data as of the end of the prior fiscal year to perform the valuation of the actuarial benefit liabilities for the current fiscal year.

EDUCATION AND VR&E

For eligible Veterans, Service members, and their dependents, VA provides four unique education/retraining programs as follows:

Program Name	Authorizing Statute	Eligibility Qualifications	Benefits
Post-9/11 GI Bill (PGIB)	38 U.S.C. Ch. 33	Veterans with at least 90 days of aggregate service after September 10, 2001, individuals honorably discharged with a service-connected disability after 30 continuous days after September 10, 2001, or individuals awarded a Purple Heart on or after September 11, 2001, and honorably discharged after any amount of service. A child or surviving spouse of an active-duty service member who died in the line of duty on or after September 11, 2001, or a child or spouse to whom benefits are transferred by a qualifying Veteran or Service member.	Tuition and fees and a monthly housing allowance, yearly textbook and supplies stipend, and one-time payment for relocation.
VR&E	38 U.S.C. Ch. 31	Veterans and Service members transitioning to civilian employment with a service-connected disability and an employment handicap or individuals with a service-connected disability pursuing independent living.	Benefits paid can include a monthly subsistence payment, tuition, books and supplies.
Survivors' & Dependents' Educational Assistance (DEA)	38 U.S.C. Ch. 35	Dependents of Veterans or Service members who are permanently and totally disabled due to a service-related condition or of Veterans or Service members who were missing in action, captured, or died while on active duty or as a result of a service-related condition.	Benefits are paid monthly based on course load and type of training.
Montgomery GI Bill-Active Duty (MGIB-AD)	38 U.S.C. Ch. 30	Veterans and Service members who have at least two years of active duty and have had their pay reduced by \$1,200 or meet other eligibility requirements.	Benefits are paid monthly based on course load, type of training, length of service, category, and college fund eligibility.

The liability for future Education and VR&E benefits is reported on VA's Balance Sheet at the present value of expected future payments and is developed on an actuarial basis. Various assumptions in the actuarial model, such as the total number of Veterans with entitlement, average benefit and usage assumptions, the number of Veterans and dependents receiving payments, and discount rates impact the liability.

VA uses the census population data as of the end of the prior fiscal year to perform the valuation of the actuarial benefit liabilities for the current fiscal year for the PGIB, VR&E, DEA, and MGIB-AD programs.

Periodically, actuarial assumptions are reviewed and updated to incorporate more current experience. When a benefit program's eligibility rules or benefit amount changes and the change is expected to have a material impact on the liability, VA may be able to estimate the impact of such a change that is not yet reflected in the actuarial assumptions or census data. The results of these estimates, and all other projections in the actuarial valuations, are dependent on the assumptions used. Actual results may differ due to actual experience deviating from the assumptions used. Changes made to actuarial models and assumptions are treated as a change in estimate and recognized immediately on a prospective basis.

MEDICAL CLAIMS

The Consolidated Appropriations Act, 2021 (P.L. 116-260) authorized VA to record a community care obligation when a claim is approved for payment. VA estimates a liability to recognize the cost of services incurred, but not yet paid. Actual administrative costs incurred annually are included in VHA's Net Program Costs shown in the accompanying Statement of Net Costs.

Additional information on the Medical Claims Benefits Liability is presented in Note 13.C.

R. FEDERAL EMPLOYEE BENEFITS

WORKERS' COMPENSATION LIABILITY

The Federal Employees' Compensation Act (FECA) provides income and medical cost protection to covered Federal civilian employees injured on the job, employees who have incurred a work-related occupational disease, and beneficiaries of employees whose deaths are attributable to job-related injuries or occupational diseases. Claims incurred for benefits for VA employees under FECA are administered by DOL and are ultimately paid by VA. DOL pays valid claims as they occur, which are billed to VA annually.

A liability is recorded for estimated and actual future payments to be made for workers' compensation pursuant to FECA. Workers' compensation comprises two components: (1) the accrued liability, which represents claims paid by DOL on behalf of VA through the current fiscal year (reported as part of the Intragovernmental Accounts Payable), and (2) the actuarial liability for compensation cases to be paid beyond the current year, as calculated by DOL (reported in Note 13 as part of the Veterans Benefits and Actuarial FECA Liability). DOL determines the actuarial liability using historical benefit payment patterns to predict future payments.

PENSION, OTHER RETIREMENT BENEFITS, AND OTHER POSTEMPLOYMENT BENEFITS

Each employing Federal agency is required to recognize its share of the cost and imputed financing of providing pension and postretirement health benefits and life insurance to its

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

employees (reported in Note 13.D). Factors used in the calculation of these pension, postretirement health, and life insurance benefit expenses are provided by OPM to each agency.

VA's employees are covered under the Civil Service Retirement System (CSRS) or the Federal Employees Retirement System (FERS). CSRS and FERS are multiemployer plans administered by OPM. OPM maintains and reports information on plan assets and actuarial data for the accumulated plan benefits. VA contributes to both plans' requirements.

S. LEASE LIABILITIES

Similar to right-to-use assets (Note 1.L), VA recognizes lease liabilities for leases that meet or exceed its lease capitalization threshold in accordance with SFFAS No. 54, *Leases*, as amended. For new leases, VA's lease capitalization threshold is applied at the rent commencement date. The notes impacted include PP&E (Note 9), Liabilities Not Covered By Budgetary Resources (Note 12), Other Liabilities (Note 15), Leases (Note 16), and the Budget and Accrual Reconciliation (Note 24).

Leases below the lease capitalization threshold are immaterial and expensed. In accordance with SFFAS No. 54, VA expenses all intragovernmental leases and leases with terms 24 months or less. In accordance with SFFAS No. 62, *Transitional Amendment to SFFAS 54*, VA elected to apply the accommodation for contracts or agreements that contain both lease components and non-lease components, such as service components, and serve a primary purpose attributable to the non-lease components. The election applies to contracts and agreements existing as of October 1, 2023, and/or those subsequently entered into or modified on or prior to September 30, 2026. Contracts or agreements meeting the criteria are accounted for as non-lease contracts or agreements for their remaining term, unless they are subsequently modified after September 30, 2026, the end of the accommodation period.

T. COMMITMENTS AND CONTINGENCIES

VA is a party in various administrative proceedings, legal actions, and claims brought against it that may ultimately result in decisions, settlements, or awards adverse to the Federal Government. Certain legal matters to which VA may be a named party are litigated by the DOJ. In some cases, the loss amount that occurs may be paid from the Judgment Fund, which is maintained by Treasury. In the opinion of VA management and legal counsel, the ultimate resolution of proceedings, actions, and claims, as reported in Note 18, will not materially affect the financial position or results of VA operations.

U. USE OF ESTIMATES

The financial statements are based on the selection of accounting policies and the application of significant accounting estimates, some of which require management to make significant assumptions. Further, the estimates are based on current conditions that may change in the future. Actual results could differ materially from the estimated amounts. The financial statements include information to assist in understanding the effect of changes in assumptions to the related information.

V. SUBSEQUENT EVENTS

Subsequent events have been evaluated through the auditors' report date, which is the date the financial statements are available to be issued and management determined that there are no other items to disclose.

NOTE 2. NON-ENTITY ASSETS

(dollars in millions)

As of September 30,	2025
Intragovernmental	
Fund Balance with Treasury	\$ 577
Accounts Receivable	1,505
Total Intragovernmental	2,082
Other Than Intragovernmental	
Accounts Receivable	179
Total Other Than Intragovernmental	179
Total Non-Entity Assets	2,261
Total Entity Assets	165,537
Total Assets	\$ 167,798

Non-entity assets are assets held by VA, but not available to be used by VA. These relate primarily to withheld taxes from employees (until disbursed appropriately to State and local entities) and amounts due to Treasury for collection of medical costs from Veterans.

Non-entity intragovernmental accounts receivable includes amounts due from financing funds to general fund receipt accounts as a result of downward subsidy re-estimates for VA's Housing Benefits Program that are eliminated on the consolidated Balance Sheet. VA has disclosed non-entity assets on a combined rather than consolidated basis within Note 2 to meet the requirement in SFFAS No. 1 to separately report entity assets from non-entity assets.

NOTE 3. FUND BALANCE WITH TREASURY

(dollars in millions)

As of September 30,	2025
Status of Fund Balance with Treasury	
Unobligated Balance	\$ 43,906
Obligated Balance Not Yet Disbursed	56,092
Deposit Funds	578
Clearing Accounts	173
Unavailable Receipts	343
Fund Balance with Treasury	\$ 101,092

Obligated and unobligated amounts differ from those reported on the Combined Statements of Budgetary Resources because budgetary balances are supported by amounts other than FWTB, such as investments and borrowing authority. Additionally, unobligated balances may contain amounts unavailable for current use and restricted to future use, such as Category C – Apportioned for future fiscal years as specified on the annual OMB Standard Form SF-132

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

(Apportionment and Reapportionment Schedule). Some FBWT components shown above are excluded from VA's budgetary resources, including deposit funds, clearing accounts, and unavailable receipts.

NOTE 4. CASH

(dollars in millions)

As of September 30,	2025
Cash	
Canteen Service	\$ 1
Agent Cashier Advance	1
Total Cash	\$ 2

Cash reported in the previous table is unrestricted and is held for use at the field stations to support canteen services and agent cashier disbursing activities.

NOTE 5. INVESTMENTS, NET

(dollars in millions)	Cost	Amortized (Premium)/ Discount	Interest Receivable	Investments, Net
As of September 30, 2025				
Intragovernmental Securities (Note 19)				
Special Bonds by Insurance Program				
Supervised Life Insurance Programs	\$ 4,761	\$ -	\$ 48	\$ 4,809
VRI	19	-	-	19
VALife	152	-	2	154
NSLI	402	-	3	405
USGLI	1	-	-	1
VSLI	543	-	4	547
Subtotal Special Bonds	5,878	-	57	5,935
Treasury Notes	148	-	2	150
Total Intragovernmental Securities	\$ 6,026	\$ -	\$ 59	\$ 6,085

Intragovernmental Securities are nonmarketable Treasury Special Bonds and Treasury Notes. Special Bonds, which mature during various years through 2040, are generally held to maturity unless needed to finance insurance claims and dividends. Amounts collected from supervised life insurance programs are invested in Special Bonds. None of the Special Bonds are reclassified as available for sale or early redemption, nor are there any permanent impairments on these investments. Treasury Notes help finance operations and events supported by the General Post Fund for the benefit of Veterans and their beneficiaries. Treasury Notes are amortized using the effective interest method, while all other Intragovernmental Securities are purchased at face value and are not amortized. The market value of the Treasury Notes is \$148 million.

Investments for the supervised life insurance programs are also dedicated collections (see Note 19). Treasury does not set aside assets to pay future expenditures associated with Funds from Dedicated Collections. The cash receipts collected from the public for Funds from Dedicated Collections are deposited with Treasury and are used for general Government purposes. Treasury security investments provide authority to draw upon the Treasury for future authorized expenditures. Treasury securities held by a fund from dedicated collections are an asset of the

fund and a liability of the Treasury, so they are eliminated in the consolidation of the Financial Report (FR) of the U.S. Government. When a fund from dedicated collections redeems its Treasury securities to make expenditures, Treasury will finance those expenditures in the same manner that it finances all other expenditures.

NOTE 6. ACCOUNTS RECEIVABLE, NET

(dollars in millions)

As of September 30,	2025

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

NOTE 7. LOANS RECEIVABLE, NET AND LOAN GUARANTEE LIABILITIES

VA operates the following direct loan and loan guarantee programs:

Program Name	Program Group	Program Type
Vendee Loans	Home Loan	Direct
Acquired Loans	Home Loan	Direct
Native American Direct Loans	Home Loan	Direct
Housing Guaranteed Loans	Home Loan	Guarantee
Insurance	Insurance	Direct
Loan Sale Guarantees	Loan Sale Guarantees	Guarantee

A. LOAN PROGRAMS

HOME LOANS

VA offers loan guarantees and direct loans to Veterans, service members, and eligible surviving spouses to purchase homes and retain homeownership with favorable market terms.

- Vendee loans are direct loans issued to a third-party borrower for the market value of the Real Estate Owned (REO) property. VA acquires REO property from a private sector mortgage lender upon default of a loan subject to the VA Loan Guarantee Program.
- Acquired loans are VA-guaranteed loans in default that VA purchases from the private sector mortgage lender. VA subsequently services the loan directly with the Veteran after VA determines the Veteran can meet debt payments.
- Native American Direct Loans are special financing loans that enable Native Americans to purchase or construct a home on Federally recognized trust land.
- Under the VA-Guaranteed Loan program, a loan may be made to an eligible Veteran borrower by an approved private sector mortgage lender. VA guarantees payment of a fixed percentage of the loan indebtedness to the mortgage lender, up to a maximum dollar amount, in the event a default by the Veteran borrower results in a loss by the mortgage lender. If the mortgage lender acquires the property that had secured the guaranteed loan at the liquidation sale, the loan holder can elect to convey the property to VA, which then attempts to resell the property at the best possible price and terms.

VA operates in the broader mortgage marketplace; as a result, VA's Home Loan Program is affected by overall housing market conditions.

INSURANCE POLICY LOANS

Veterans who are Government life insurance policyholders with permanent plan coverage or paid-up additional insurance other than VA life insurance can borrow against the cash value of their policy, creating an insurance policy direct loan. The policyholders can borrow up to the maximum of the cash surrender value of the policy or the paid-up additional insurance.

LOAN SALE GUARANTEES

VA owns REO properties as a result of VA-guaranteed loans that defaulted and have gone through the foreclosure process with the mortgage servicer. VA has the option to sell the REO property to third-party buyers and to finance such REO sales through the origination of a direct

loan. To reduce the administrative burden of servicing these loans, VA has the authority to bundle these loans and sell them to a third-party investor (Trust) pursuant to a sale agreement.

Under the sale agreement, the Trust purchases the mortgage loans and other property acquired in the sale and makes elections to treat certain assets as one or more Real Estate Mortgage Investment Conduits for U.S. Federal income tax purposes. In addition, the Trust issues certificates backed by mortgage loans and installment contracts. The certificates represent interests in the assets of the Trust and are paid from the Trust's assets. On the closing date of the certificates, VA transfers its entire interest in the related loans receivable and collateral to the Trustee for the benefit of the related certificate holders pursuant to the sale agreement. VA guarantees that the investor receives full and timely distributions of the principal and interest on the certificates backed by the full faith and credit of the Federal Government.

B. LOANS RECEIVABLE

Loans receivable are secured by the underlying real estate and insurance policies. Direct Home Loans made after FY 1991 include direct loans disbursed by VA under the Native American Direct Loan program as well as guaranteed home loans acquired by VA under the VASP program.

On May 31, 2024, VA launched the VASP program under existing authorities 38 U.S.C. §§ 3732 and 3720, to help Veteran avoid foreclosure and stay in their homes. Under the VASP program, VA purchased the Veteran's modified loan from mortgage servicers to reach an affordable monthly mortgage payment. The VASP program is no longer accepting new entrants as of May 2025. VA acquired \$10.0 billion in VASP loans during FY 2025. Defaulted guaranteed home loans include amounts where VA performed a partial claim payment to the mortgage servicer for defaulted loan payments from the borrower that have exited forbearance under the Coronavirus Disease 2019 (COVID-19) related programs.

For Direct Home Loans, interest income is accrued at the contractual rate on the outstanding principal amount. Interest continues to accrue on non-performing loans at the contractual rate. For defaulted guaranteed loans made prior to March 1, 1988, interest income is accrued based on the outstanding loan amount. In accordance with 38 U.S.C §§ 3713 and 3714, VA does not establish a receivable or accrue interest on defaulted home loans guaranteed on or after March 1, 1988.

All insurance policy loans issued since November 2, 1987, have a variable interest rate with a minimum of 5.00% and a maximum of 12.00%. Rate changes are tied to the 10-year constant maturity of the U.S. Treasury Securities Index and may only change on October 1, and the variable rate has been 5.00% since October 1, 2001.

The recorded value of loans receivable, net, and the value of assets related to loans receivable are not the same as the proceeds that VA would expect to receive from selling its loans. It is at least reasonably possible that the proceeds from the sale of its loans will differ from the reported carrying value of the loans receivable and the underlying value of their related assets, which will result in a realized gain or loss on sale.

Ending Balance of Loans Receivable, Net	\$ 10,602

FORECLOSED PROPERTY

Prior to the foreclosure of property secured by a VA Loan Guarantee, VA obtains an independent property appraisal. Future cash flows are calculated based on the appraised selling price less amounts paid at foreclosure and estimated costs to carry the property. The amount recorded for foreclosed property is derived from the present value of these future cash flows.

Potential volatility in the U.S. housing market could change the estimates and assumptions used for these calculations, which may impact the amounts reported and disclosed herein. There has been no change in the methodology for calculating the amount recorded for foreclosed property and there are no restrictions on the use or disposition of foreclosed property for the period ended September 30, 2025.

As of September 30, 2025, the number of residential properties in VA's inventory that have foreclosed is 5,000. The average holding period from the date properties are conveyed to VA until the date properties are sold was approximately 2 months for FY 2025. The number of properties for which foreclosure proceedings are in process is 49,572 as of September 30, 2025.

C. ALLOWANCE FOR SUBSIDY FOR DIRECT LOANS (POST-FY 1991)

The allowance for subsidy represents the difference between balance of the loans receivable and the present value of the estimated net cash flows to be paid by VA.

SCHEDULE FOR RECONCILING SUBSIDY COST ALLOWANCE BALANCES

(dollars in millions)	2025
As of September 30,	
Allowance Balance as of October 1,	\$ (104)
Subsidy Expense for Direct Loans Disbursed During the Reporting Years	2,492

Other	320
Total Adjustments	47
Ending Balance of the Subsidy Cost Allowance Before Reestimates	2,435
Total Subsidy Reestimates	681
 Ending Balance of the Subsidy Cost Allowance	 \$ 3,116

D. SUBSIDY EXPENSE

Subsidy expense represents the budgetary costs to the Government, which are the present value of cash flows of Federal loan guarantees and direct loans, excluding all administrative costs. VA also reports revisions to subsidy expense, which are categorized as subsidy re-estimates.

VA uses a statistical model of economic data to estimate cash flow and subsidy expenses for VA direct loans and home loan guarantees. The key inputs to the model are loan disbursements, claims, recoveries, mortgage rates, Treasury bond yields, home price appreciation, and borrower payments. VA updates the models with actual loan data and programmatic and economic assumptions on an annual basis. The model data is input into the OMB Credit Subsidy Calculator to discount the cash flows and calculate reestimated subsidy. The subsidy rates disclosed below pertain only to the current-year cohorts. These rates cannot be applied to the direct loans disbursed or acquired during the current reporting year to yield the subsidy expense. The subsidy expense for new loans reported in the current year could result from disbursements of both current year cohorts and prior year(s) cohorts. The subsidy expense reported in the current year also includes modifications and re-estimates.

Direct and Guaranteed Loans Subsidy Rates	Defaults, Net of Recoveries				All Other	Total Subsidy Rate
	Interest	Fees

New Guaranteed Home Loans	\$ 183,298	\$ 45,403	474,382

F. LOAN GUARANTEE LIABILITIES

The liability on the guaranteed loans is based on the present value of the estimated net cash outflows considered most likely to be paid by VA as a result of claims against the guarantees.

Each year, VA recalculates its estimated long-term future cash flows from guaranteeing loans. This is an actuarial calculation on a net present value basis. In the following year, the subsidy required from the reestimates are reassessed for budgetary purposes. The difference between the accrued liability from the actuarial reestimate and the amount approved by OMB arises from timing differences and differing assumptions used in estimating the accrued loan guarantee liability compared to those used in preparing VA's budget requests. The budget estimates approved by OMB are reflected in VA's apportionment.

G. LOAN GUARANTEE MODIFICATIONS

In FY 2025, due to the termination of the VASP program, VA recorded a modification subsidy cost of \$2.1 billion. The FY 2025 modification was calculated using discount rates from 4.30% - 5.00%.

On July 30, 2025, the VA Home Loan Program Reform Act, P.L. 119-31, was signed into law establishing the 'Partial Claim Program', under which VA may make partial claim payments with respect to a guaranteed loan for the primary residence of a borrower that is in default or at imminent risk of default. VA is currently assessing the effect of this new law to the loan guarantee liability. Additional data and analysis are needed to develop an estimate in accordance with SFFAS No. 2, *Accounting for Direct Loans and Loan Guarantees* and SFFAS No. 5, *Accounting for Liabilities of the Federal Government*.

H. ADMINISTRATIVE EXPENSE

The administrative expense for direct and guaranteed loans for the period ended September 30, 2025, is \$266 million.

NOTE 8. INVENTORY AND RELATED PROPERTY

(dollars in millions)	2025
As of September 30,	
Inventory Held for Sale	\$ 21

Balance as of September 30,	\$ 42,335

NOTE 10. HERITAGE ASSETS

Heritage Assets possess significant educational, cultural, or natural characteristics. VA classifies its Heritage Assets as:

- Art collections (including artwork, archives, historic medical equipment, medals, and awards, furniture, archaeological materials, and photographs);
- Archaeological sites;
- Buildings (including historic hospitals, quarters, lodges, warehouses, laboratories, and chapels, but excluding multi-use buildings);
- Monuments; and
- Non-buildings (including flag poles, structures, rostrums, gates, and historic walls).

VA Heritage Assets can be acquired through purchases, transfers, donations and devises. The acquisition is tied to Federal preservation requirements under laws such as NHPA.

VA has a highly regulated process for the withdrawal or disposal of Heritage Assets which parallels VA's disposal for its real property assets. The general order of priority for property withdrawals is: internal reassignment, transfer to other VA facilities, transfer to another Federal agency, public benefit conveyance, sale, and abandonment or destruction.

As of September 30, 2025, VA has 1,128 multi-use Heritage Assets (multi-use buildings and national cemeteries) that are included in PP&E. Multi-use Heritage Assets have both operating and historic characteristics and are used predominantly in Government operations such as administration, engineering, and maintenance.

<i>(in units)</i> As of September 30, 2025	Beginning Balance	Increases	Decreases	Ending Balance
Archaeological Sites	10	-	-	10
Art Collections	39	-	-	39
Buildings	575	141	(41)	675
Monuments	1,413	-	(2)	1,411
Non-Buildings	1,042	-	(5)	1,037
Multi-Use Buildings in PP&E	1,073	35	(137)	971
Soldiers' Lots and Monument Sites	35	-	-	35
National Cemeteries	155	2	-	157
Total Heritage Assets in Units	4,342	178	(185)	4,335

NOTE 11. DEBT

<i>(dollars in millions)</i> As of September 30, 2025	Beginning Balance	Net Borrowing	Net Interest Payable	Ending Balance
Source of Debt (Intragovernmental)				
Debt Owed to:				
Federal Financing Bank (FFB)	\$ 4	\$ -	\$ -	\$ 4
Treasury other than the FFB	959	8,088	-	9,047
Total Debt	\$ 963	\$ 8,088	\$ -	\$ 9,051

Debt to Treasury consists of amounts borrowed for the Direct Loan and Loan Guarantee Programs. Debt to the Federal Financing Bank consists of amounts borrowed for the VA's Transitional Housing Loan Guarantee Program. Under both debts, VA has a 30-year term from the date of issuance with the exception of the Vocational Rehabilitation Loan Program which has a 2-year term from the date of issuance. Additionally, principal repayment is expected within 10 months from the date of issuance of debt.

Net borrowings do not include any amounts that result from refinancing debt. There are no redemptions or calls of debts before maturity or write-offs of debt owed to Treasury.

The total debt increase of \$8.1 billion in fiscal year 2025 is primarily due to increased borrowings from Treasury necessary for an increase in VASP related loans.

FINANCIAL SECTION**NOTES TO THE FINANCIAL STATEMENTS**

NOTE 12. LIABILITIES NOT COVERED BY BUDGETARY RESOURCES

Liabilities not covered by budgetary resources are unfunded liabilities that require Congressional action before budgetary resources can be provided. Following are VA's unfunded liabilities.

Liabilities not requiring budgetary resources are liabilities that have not and will never require Congressional action. These are primarily deposit and clearing accounts, custodial liabilities, and general fund receipts. They can be fully liquidated without the use of budgetary resources.

(dollars in millions)

As of September 30,	2025
Intragovernmental	
Workers Compensation (FECA)	\$ 473
Future Funded Expense - Contract Dispute Act	97

Total Liabilities	<u>\$ 7,627,557</u>

NOTE 13. FEDERAL EMPLOYEE AND VETERANS BENEFITS LIABILITIES

The following table provides a breakdown of the Veterans Benefits and Actuarial FECA Liability reported on the Balance Sheet.

(dollars in millions)

As of September 30,	2025
Compensation	\$ 7,292,150
Education and VR&E	259,647
Burial	10,524
Medical Claims Benefits	5,454
Actuarial FECA Liability	2,308
Total Veterans Benefits and Actuarial FECA Liability	<u>\$ 7,570,083</u>

A. COMPENSATION AND BURIAL

VA provides Disability Compensation (Compensation) benefits to the following individuals:

- 1) Eligible Veterans who are disabled by an injury or disease incurred or aggravated in active military service, and their dependents;
- 2) Certain spouses and dependents of eligible Veterans who died as a result of a service-related illness or injury; and
- 3) Dependents of Service members who died during active military service.

Burial benefits, including burial flags, headstones or markers and grave liners for burial in a VA National Cemetery, or a plot allowance for burial in a private cemetery, are provided to Service members who died during active military service and Veterans who separated under other-than-dishonorable conditions.

The VA Compensation and Burial Programs are not defined benefit plans and have no plan assets set aside to fund future costs. VA funds the current year costs of Veterans service-related disability compensation and burial costs through its annual appropriations.

VA also provides eligible wartime Veterans and/or their dependents with pension benefits if the Veteran died, is over age 65 or is permanently and totally disabled, based on annual eligibility reviews. Unlike a traditional pension program, the VA pension is only available to wartime Veterans who meet a financial means test. As such, only the amounts currently due and payable are reflected as a liability on the Balance Sheet, which is consistent with Federal accounting standards.

ASSUMPTIONS USED TO CALCULATE THE VETERANS BENEFITS LIABILITY – COMPENSATION AND BURIAL

A liability is recognized for the present value of projected benefit payments to:

- 1) Beneficiaries, including Veterans and Survivors, currently receiving benefit payments;
- 2) Current Veterans and Survivors, who will become future beneficiaries of the Compensation Program; and
- 3) An estimate of Service members (and their Survivors) who gained eligibility as of the valuation date and will become future beneficiaries.

The actuarial liability for Compensation and Burial benefits as of September 30, 2025, was \$7.3 trillion representing an increase of \$93.3 billion.

The total Veterans Benefits Actuarial Cost, Excluding Assumption Changes, increased the liability by \$156.0 billion and is made up of the components below.

- **Interest on Liability** increased the liability by \$211.3 billion due to 1 year of interest on prior year-end liability using the single equivalent discount rate from the prior year's valuation, offset by interest on benefit payments.
- **Prior Service Costs from Plan Amendments** increased the liability by \$11.8 billion as a result of rulemaking changes that included \$7.6 billion for presumptive service connection for bladder, ureter, and related genitourinary cancers due to exposure to fine particulate matter, and an increase of \$4.2 billion for presumptive service connection for

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

leukemias, multiple myelomas, myelodysplastic syndromes, and myelofibrosis due to exposure to fine particulate matter.

- **Experience** increased the liability by \$119.9 billion as a result of changes in beneficiary counts, benefit amounts, and data used for certain adjustment factors. Other contributing factors include reductions to or removal of pre-existing legislative adjustments, change in the underlying Veteran population from USVETS to Veteran Object (VO), and replacing the PACT Act long-term cash flow adjustment to reflect experience.
- **Amounts Paid** decreased the liability by \$187.0 billion due to an estimate of annual benefit payments made during FY 2025, based on the expected FY 2025 benefit payments generated in the prior year's model.

The Gain/Loss from Assumption Changes was a decrease of \$62.8 billion which consisted of the following.

- **Discount Rate Assumptions** decreased the liability by \$225.9 billion due to updating the last 10 years of published Treasury spot rates through March 31, 2025.
- **Other Assumptions** increased by \$148.9 billion and consist of the following:
 - Methodology of estimating the PACT Act impact: increased the liability by \$108.0 billion due to model assumption updates related to the Compensation new case rates, disability rating change rates, and retroactive payment load, which affected the assumed short term benefit usage.
 - Non-death termination assumption: increased the liability by \$39.6 billion due to an updated experience study that used data from 2015 through 2024. The results of the study indicated an overall decrease in non-death termination rates.
 - Other model changes: increased the liability by \$1.3 billion due to various improvements to the actuarial model, including basing the burial average payment assumption on expenditure data rather than obligation data, and using Deaths data from the VO process instead of VetPop.
- **COLA Rates** increased by \$14.2 billion because of the increase in the projected 2026 COLA rate. The COLA rate assumption for the first projection year was 2.60% as of September 30, 2025, updated from the long-term COLA rate of 2.40%. The long-term COLA rate assumption is based on the intermediate assumptions published in the Social Security Administration's (SSA) most recent Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds.

For the Period Ended September 30,	2025
Discount Rate, Single Equivalent	3.10%
COLA Rate, Year 1	2.60%
Long-Term COLA Rate	2.40%

B. EDUCATION AND VR&E BENEFIT LIABILITIES

VA estimates Education and VR&E benefit liabilities for Servicemembers, Veterans, and Survivors on an actuarial basis. Like the Compensation and Burial model, the Education and VR&E models use data that are specific to the population, which is not available from outside sources (for example, outside of the Federal Government). These models are updated annually to reflect updated assumptions and data.

ASSUMPTIONS USED TO CALCULATE EDUCATION AND VR&E BENEFIT LIABILITIES

To calculate the present value of the Education and VR&E benefit liabilities, the following discount rates are based on the average of the last 10 years of quarterly zero-coupon Treasury spot rates. The Long-term COLA rates for the tuition and housing were derived from OMB COLA rates for tuition and housing. The housing COLA rate applies to the PGIB program only. The subsistence COLA rates were derived from published Consumer Price Index (CPI-W) and projected CPI-W rates from OMB. The number of projection years in each model are 71 years for PGIB, 52 years for VR&E, 50 years for DEA, and 34 years for MGIB-AD.

	2025			
	Post-9/11	VR&E	DEA	MGIB-AD
Discount Rate, Single Equivalent	2.80%	2.70%	2.90%	2.60%
Long-Term COLA Rate, Tuition	3.70%	3.70%	N/A	3.70%
Long-Term COLA Rate Subsistence/Housing	3.00%	2.20%	2.20%	N/A

The actuarial liability for Education and VR&E benefits as of September 30, 2025, was \$259.6 billion representing an increase of \$47.2 billion.

The total Veterans Benefits Actuarial Cost, Excluding Assumption Changes, increased the liability by \$28.6 billion and is made up of the following components:

- **Interest on Liability** increased the liability by \$5.4 billion due to 1 year of interest on prior year-end liability using the single equivalent discount rate from the prior year's valuation, offset by interest on benefit payments.
- **Prior Service Costs from Plan Amendments** increased the liability by \$1.3 billion due to the addition of the same two legislative changes as the Compensation model to the DEA model, and an additional legislative change, P.L. 117-328 Cleland-Dole which eliminated the delimiting date and age restrictions for DEA beneficiaries if eligible after August 2023.
- **Experience** increased the liability by \$35.3 billion due to changes in the PGIB, VR&E, and DEA programs. Changes to the PGIB benefits model included adding new eligible enrollees in the first year of the model, changing a data source, and converting the model to a fiscal year basis using the prior year-end data. Changes to the VR&E benefits model included adding expected new disabilities in the first model year to include all expected Veterans with disability ratings as of the valuation date and including actual PACT Act experience as of the end of the prior fiscal year. Changes to the DEA benefits model included changing the data source for projecting future dependent enrollees to VO data (similar to the Compensation and Burial model) and including actual PACT Act experience as of the end of the prior fiscal year.

- **Amounts Paid** decreased the liability by \$13.4 billion due to an estimate of annual benefit payments made during FY 2025, based on the expected FY 2025 benefit payments generated in the prior year's model.

The Gain/Loss from Assumption Changes was an increase of \$18.6 billion which consisted of the following:

- **Discount Rate Assumptions** decreased by \$5.6 billion from updating the last 10 years of published Treasury spot rates through March 31, 2025.
- **Other Assumptions** increased by \$25.1 billion mainly due to the addition of unlimited new enrollee cohorts in the PGIB model based on the latest program outlook and a new model design, offset by a new COLA methodology including applying consistent tuition, subsistence, and housing COLA rates across all programs. In addition, there was a smaller increase in the DEA and VR&E model for updating PACT Act assumptions.
- **COLA Rates** decreased by \$0.9 billion due to the difference in benefit inflation rates derived from actual and projected CPI-W and the final Education and Housing COLAs from OMB.

On April 16, 2024, the Supreme Court issued a decision in a case that potentially impacts individuals with multiple periods of active-duty service who are entitled to MGIB-AD benefits under one period of service and PGIB benefits under another period of service, and whether they are entitled to a combined total of 36 months of benefits (which was VA's prior interpretation of the governing statutes) or 36 months of benefits under each program subject to the 48-month aggregate cap. The Supreme Court determined that the latter entitlement subject to the 48-month rule applies in this scenario. VA is currently assessing the effect of these benefits entitlements and needs additional data and analysis to develop a reasonable estimate in accordance with SFFAS No. 5, *Accounting for Liabilities of the Federal Government*.

OTHER RELEVANT CONSIDERATIONS FOR THE ESTIMATION OF THE COMPENSATION, BURIAL, EDUCATION, AND VR&E LIABILITIES

VA programs are unlike any other in the Federal Government or commercial environment. As such, to develop the estimates VA uses certain data that are specific to the population of Veterans and Veterans' beneficiaries, which is not available from outside sources.

When computing the liability, VA's actuaries make assumptions about the future. There are two primary types of assumptions: economic assumptions that are used for modeling how the time value of money affects the net cost estimates and demographic assumptions that are used for modeling how participants' behaviors affect the amount and timing of benefit payments. Key economic assumptions include interest rate and COLA, while major demographic assumptions include mortality rates, expected level of benefit usage, and remaining benefits (where applicable).

Actuarial practice commonly involves the estimation of uncertain events and cash flows that will occur for many years after the valuation date. For example, since Compensation benefits begin for a Veteran and can continue to Survivors, the projection period for the Compensation and Burial model is 100 years. The Compensation and Burial model has been explicitly modeled for the next 100 years to capture all significant projected liabilities for Veterans and Veterans'

beneficiaries. The 100-year projection period can also increase the overall sensitivity of the model for certain assumption changes, producing changes in the liability.

The Compensation, Burial, Education, and VR&E models are updated periodically to reflect emerging plan experience and updated annually for routine assumption updates. VA considers these estimates to be reasonably stated as of September 30, 2025.

While VA has incorporated the PACT Act into the Compensation, DEA, and VR&E models, the estimate may change in future years due to policy updates including but not limited to shifts in application approval rates and expansion of eligible locations.

RECONCILIATION OF VETERANS COMPENSATION, BURIAL, EDUCATION, AND VR&E ACTUARIAL LIABILITIES

<i>(dollars in millions)</i>	Compensation	Burial	Education and VR&E	Total
As of September 30, 2025				
Liability as of October 1, 2024	\$ 7,198,500	\$ 10,900	\$ 212,463	\$ 7,421,863
Expense for the Period:				
Interest on the Liability Balance*	211,023	319	5,448	216,790
Actuarial (Gain)/Loss:				
Experience*	120,266	(359)	35,314	155,221
Assumption Changes:				
Discount Rate	(225,503)	(350)	(5,563)	(231,416)
COLA Rate	14,180	21	(922)	13,279
Other Assumptions	148,565	328	25,089	173,982
Net (Gain)/Loss from Assumption Changes	(62,758)	(1)	18,604	(44,155)
Prior Service Costs from Plan Amendments*	11,822	-	1,260	13,082
Total Expense	280,353	(41)	60,626	340,938
Less Amounts Paid*	(186,703)	(335)	(13,442)	(200,480)
Net Change in Actuarial Liability	93,650	(376)	47,184	140,458
Liability as of September 30, 2025	\$ 7,292,150	\$ 10,524	\$ 259,647	\$ 7,562,321

*The sum of these changes represents Veterans benefits actuarial cost, excluding assumption changes on the Statement of Net Cost for FY 2025.

C. VETERANS BENEFITS – MEDICAL CLAIMS

VA provides care to Veterans and eligible dependents through community providers when necessary. Community care eligibility is dependent upon the availability of VA care, the needs and circumstances of individual Veterans and enrollment requirements, which vary by program.

INCURRED BUT NOT REPORTED MODEL FOR MEDICAL CLAIMS BENEFITS

To recognize a liability for services incurred but not yet paid, VA uses a standard actuarial model, which provides a framework for estimating complete versus incomplete incurred claims based on prior period claim lag patterns. The actuarial liability is developed using monthly claims paid by program and service date, eligibility, and enrollment data.

D. FEDERAL EMPLOYEE BENEFITS

The following table provides a breakdown of the Federal Employee Salary, Leave, and Benefits Payable Liabilities reported on the Balance Sheet. It presents the estimated amount of liability for salaries, wages, and funded annual leave and sick leave that have been earned but are unpaid, as well as the amount for unpaid leave earned that an employee is entitled to upon separation and that will be funded by future years' budgetary resources. In addition, it presents

FINANCIAL SECTION**NOTES TO THE FINANCIAL STATEMENTS**

the employer portion of payroll taxes and benefit contributions, such as retirement and health and life insurance for covered employees.

(dollars in millions)

As of September 30,	2025
Unfunded Leave	\$ 3,712
Accrued Funded Payroll and Leave	1,672
Employer Contributions and Payroll Taxes Payable	15
Total Federal Employee Salary, Leave, and Benefits Payable	\$ 5,399

VA generates costs related to employee benefit plans that include retirement, health insurance and life insurance benefit plans. OPM is responsible for the management and accounting of such plans and passes the expense, known as imputed cost, on to VA.

(dollars in millions)

For the Period Ended September 30,	2025
CSRS and FERS	\$ 2,928
Federal Employees Health Benefits	3,914
Federal Employees Group Life Insurance	9
Total Imputed Expenses-Employee Benefits	\$ 6,851

NOTE 14. ENVIRONMENTAL AND DISPOSAL LIABILITIES

VA has unfunded Environmental and Disposal Liabilities in the amount of \$993 million as of September 30, 2025. The majority of VA's unfunded Environmental and Disposal Liabilities involve asbestos removal, lead abatement, replacement of underground oil and gasoline tanks, decommissioning of waste incinerators, and decontamination of equipment prior to disposal. Included in the total unfunded Environmental and Disposal Liabilities are the liabilities for the removal of friable asbestos of \$211 million and nonfriable asbestos of \$512 million as of September 30, 2025.

While some facilities have applied prevailing State regulations that are more stringent than Federal guidelines, Occupational Safety and Health Administration and Environmental Protection Agency regulations are the legal basis behind the majority of VA's Environmental and Disposal Liabilities. Estimated liabilities for these projects are based on known contamination that exists today and have been computed by the facility engineering staff based on similar projects already completed or by independent contractors providing work estimates.

It is at least reasonably possible that the estimated liabilities will change, as a result of changes in applicable laws and regulations, technology, future location requirements or plans, budgetary resources, and changes in future economic conditions including inflation and deflation.

NOTE 15. OTHER LIABILITIES

Other Liabilities are liabilities not reported elsewhere in the Balance Sheet. They consist of funded and unfunded intragovernmental and Other Than Intragovernmental Liabilities. In general, funded liabilities are current liabilities, while unfunded liabilities represent future financial commitments that are not funded and considered noncurrent.

(dollars in millions)

As of September 30,

2025

Intragovernmental

Other Liabilities (Without Reciprocals)	\$ 163
Liability to the General Fund of the U.S. Government and Other Non-Entity Assets	1,684
Other Current Liabilities - Benefit Contribution Payable	829
Other Liabilities	107
Total Intragovernmental	2,783

Other Than Intragovernmental

Other Liabilities Without Related Budgetary Obligations	486
Other Liabilities With Related Budgetary Obligations	368
Contingent Liabilities Without Budgetary Obligations	677
Contract Holdbacks	13
Liability for Clearing Accounts	160
Liability for Non-Fiduciary Deposits Funds and Undeposited	576
Lease Liability Without Budgetary Obligations (Note 16)	1,959
Total Other Than Intragovernmental	4,239
Total Other Liabilities	\$ 7,022

NOTE 16. LEASES

VA's intragovernmental leases consist of occupancy agreements (OAs) for real property rentals and vehicle rentals from General Services Administration (GSA). For OAs, GSA charges rental rates for space that approximates commercial rental rates for similar properties. The terms of GSA OAs vary according to whether the underlying assets are owned directly by the Federal Government or rented by GSA from third-party commercial property owners. Some GSA OAs can be cancellable with varying periods of notice required (generally 4 to 6 months).

Cancellation requires a payment of all unamortized tenant improvements and rent concessions not yet earned. GSA OAs may also be non-cancellable, where VA would be financially responsible for rent payments on vacated space until the expiration of the OA, the termination of the OA permitted under the lease terms, or until the occupancy by a replacement tenant covers VA's total rent obligation. VA's lease expense for OAs for the period ended September 30, 2025, is \$236 million. In addition to real property rental from GSA, VA also rents vehicles from GSA to provide transportation services to Veterans and for employees' official business. GSA charges rental rates based on monthly lease and mileage charges, published in a GSA bulletin. Monthly lease and mileage charges include all maintenance and fuel expenses. Vehicle rental agreements are cancellable by either VA or GSA subject to a reuse of leased vehicles clause. VA's lease expense for vehicles with GSA for the period ended September 30, 2025, is \$168 million.

VA's significant other than intragovernmental real property (right-to-use) lease portfolio primarily includes leases for Veterans medical facilities and clinics, where VA rents real property directly from third-party commercial property owners through GSA delegated authority. Real property leases for medical facilities and clinics with third-party commercial property owners have initial lease terms of 15 to 20 years. VA normally occupies the leased real property for the entire initial lease term without exercising termination rights that become available in the latter parts of the lease term.

FINANCIAL SECTION**NOTES TO THE FINANCIAL STATEMENTS**

Other than intragovernmental leases exceeding 24 months are reported on the Balance Sheet as part of Other Liabilities (Note 15) at the present value of future lease payments. The lease liability is also included in Liabilities Not Covered by Budgetary Resources (Note 12). The present value is calculated using the Treasury rates for notes and bonds of similar durations, ranging from 4.21% to 6.00% for the period ended September 30, 2025. VA's lease interest expense for this period is \$98 million, and the leased asset amortization expense is \$170 million.

The following table represents future payments due for leases with other than intragovernmental entities reported as a liability on the Balance Sheet.

(dollars in millions)

Fiscal Year	Principal	Interest	Total
2026	\$ 142	\$ 92	\$ 234
2027	142	86	228
2028	149	79	228
2029	156	71	227
2030	158	64	222
2031 – 2035	716	211	927
2036 – 2040	356	79	435
2041 – 2045	140	12	152
Total	\$ 1,959	\$ 694	\$ 2,653

VA's Enhanced Use Lease (EUL) program allows VA to manage underutilized property through leasing arrangements with state or local governments or private sector organizations that provide benefits to Veterans through expanded access to a range of services, including housing, job training, and mental health counseling. Most of VA's current EUL projects exist to provide safe and affordable housing to Veterans and their families. VA frequently enters into EUL arrangements as the lessor, under which VA receives immaterial or no consideration, as authorized by 38 U.S.C. §§ 8161-8169. VA is not entitled to, nor does it recognize private sector investment into EULs as revenue. In FY 2025, VA does not have any EUL arrangements, where VA is the lessor, that meet the right-to-use lease criteria established by SFFAS No. 54.

NOTE 17. LIFE INSURANCE BENEFITS

VA administers seven life insurance programs: USGLI, NSLI, VSLI, VRI, S-DVI, VMLI, and VALife.

INSURANCE LIABILITY BALANCES

<i>(dollars in millions)</i> As of September 30, 2025	Insurance Death Benefits	Death Benefit Annuities	Disability Income & Waiver	Reserve Totals
NSLI	\$ 199	\$ 11	\$ 1	\$ 211
VSLI	357	1	1	359
S-DVI	1,024	4	528	1,556
VRI	10	-	-	10
VMLI	212	-	-	212
VALife	152	-	-	152
Subtotal	1,954	16	530	2,500
Insurance Dividends Left on Credit or Deposit				222
Dividends Payable to Policyholders				3
Unpaid Policy Claims				169
Insurance Liabilities Reported on the Balance Sheet				2,894
Less Liabilities Not Covered by Budgetary Resources (Note 12)				(1,521)
Liability Covered by Budgetary Resources				\$ 1,373

The USGLI program has no remaining policyholders and does not meet VA's reporting threshold. VA continues to pay insurance proceeds to USGLI policy beneficiaries who receive lifetime annuities. Unpaid policy claims primarily consist of insurance claims that are pending at the end of the reporting period and an estimate of claims that have been incurred but are not yet reported, both of which are payable from the insurance funds.

SCHEDULE FOR RECONCILING LIFE INSURANCE UNPAID POLICY CLAIM LIABILITY

<i>(dollars in millions)</i> As of September 30, 2025	Unpaid Claim Liability as of October 1, 2024	Claims Expenses	Less Payments to Settle Claims	Ending Unpaid Claim Liability Balance
NSLI	\$ 68	\$ 96	\$ (101)	\$ 63
VSLI	50	82	(86)	46
S-DVI	46	106	(101)	51
VRI	2	4	(4)	2
VMLI	7	18	(20)	5
VALife	-	9	(7)	2
Total	\$ 173	\$ 315	\$ (319)	\$ 169

VA supervises the administration of two life insurance programs, SGLI and VGLI, which are administered by Prudential. Prudential holds reserves needed for claims and administration while the group policy is in effect. Further, a contingency reserve is used to account for adverse fluctuations in claims under the policy, as required by law. These reserves are maintained in Prudential's financial records since the risk of loss is assumed by Prudential and its reinsurers. Within its revolving fund, VA holds excess funds that are not required to cover program liabilities

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

held by Prudential but are available to support the SGLI and VGLI programs. In FY 2025, VA recouped \$400 million of excess Contingency Reserve funds held by Prudential for SGLI to maintain the contingency reserve balance within the target range, by withholding SGLI and Family SGLI premium payments.

A. CASH SURRENDER VALUE

The cash surrender value represents the amount that is contractually available to a policyholder upon voluntary termination of their life insurance policy. The likelihood all policies will terminate in the same time period is remote.

(dollars in millions)

As of September 30,	2025
NSLI	\$ 189
VSLI	335
S-DVI	841
VRI	9
VALife	28
Total*	\$ 1,402

*Under VMLI, since the insured homeowner has no equity in the policy, claims are payable to mortgage companies.

B. PROGRAM COSTS, PREMIUMS COLLECTED, AND APPROPRIATIONS USED

<i>(dollars in millions)</i> For the Period Ended September 30, 2025	Program Costs	Premiums Collected	Appropriations Used

VALife	15	97	-
Total	\$ 467	\$ 181	\$ 135

C. INSURANCE IN-FORCE

The amount of insurance in-force represents the total face amount of life insurance coverage provided by each administered and supervised program at the end of the fiscal year. It includes any paid-up additional coverage provided under these policies. The possibility that claims filed in any time period will equal the entire insurance in-force amount is remote. The following information provided under the supervised programs is unaudited.

D. POLICY DIVIDENDS

The Secretary determines annually the excess funds available for dividend payment. Policy dividends for FY 2025 were \$6 million.

NOTE 18. COMMITMENTS AND CONTINGENCIES

VA records a contingent liability of \$677 million for FY 2025, for pending legal claims where losses are determined to be probable, and the amounts can be estimated. The liability from existing medical malpractice and other tort claims is estimated using generally accepted actuarial standards and procedures. Estimates of future claim payments are discounted using a yield curve, which is based on a 10-year average of quarterly zero-coupon Treasury spot rates evaluated as of March 31, 2025. Non-tort claims typically involve contract disputes and employment matters. Losses arising from similar claims that are reasonably possible and estimable are disclosed rather than accrued as liabilities.

<i>(dollars in millions)</i>	Accrued Liabilities	Estimated Range of Loss	
For the Period Ended September 30, 2025	Low	High	
Legal Contingencies			
Probable - Medical Malpractice and Other Torts	\$ 455	\$ 455	\$ 455

Reasonably Possible - Non-Tort		1	89
Total	\$ 677	\$ 678	\$ 826

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

As of September 30, 2025, there are cases and claims not brought under the Federal Tort Claims Act, where there is at least a reasonable possibility that a loss may occur, for which the potential range of loss cannot be determined.

VA is a defendant to litigation involving the 388-acre West Los Angeles VA Campus (“West LA Campus”). The plaintiffs allege in part that VA has failed to provide adequate supportive housing benefits for certain Veterans, and that some land use agreements do not comply with the terms of the West LA Leasing Act of 2016. Following the District Court’s October 2024 judgment in favor of the plaintiffs, VA appealed to the Ninth Circuit which granted a temporary stay of the District Court’s judgment pending appeal on November 25, 2024, and heard oral arguments on five related appeals on April 8, 2025. As of September 2025, the Ninth Circuit’s decision on these appeals is still pending.

VA is involved in a case regarding whether Veterans with a single period of service may be eligible to receive two types of educational benefits. The Board issued a decision which denied a Veteran’s entitlement to MGIB benefits after it determined the Veteran had elected to receive PGIB benefits. In its decision, the Board stated that Congress enacted statutory changes in 2011 which bar eligibility to receive benefits under both PGIB and MGIB based on a single period of service. On May 16, 2025, the U.S. Court of Appeals for Veterans Claims reversed the Board’s decision and held that a Veteran’s single period of service of sufficient length could be used to establish two separate entitlements to MGIB and PGIB educational assistance benefits. VA is currently seeking to appeal.

VA also records an expense and Imputed Financing source for the Judgment Fund’s pending claims and settlements. The Judgment Fund accounting is shown in the following table.

<i>(dollars in millions)</i>	2025
For the Period Ended September 30	
Fiscal Year Settlement Payments	\$ 121
Less Contract Dispute and “No Fear” Payments	(8)
Imputed Financing-Paid by Other Entities*	\$ 113

*The Imputed Financing-Paid by Other Entities in the table above, when combined with the Total Imputed Expenses – Employee Benefits reported in Note 13 reconciles to total Imputed Financing costs reported in the Consolidated Statement of Changes in Net Position.

In accordance with 38 C.F.R. § 17.36 (c), the Secretary makes an annual enrollment decision that identifies which Veterans, by priority, will be treated for that fiscal year based on funds appropriated, estimated collections, usage, the severity index of enrolled Veterans and changes in cost. While VA expects to continue to provide medical care to Veterans in future years, an estimate of this amount cannot be reasonably made. Accordingly, VA recognizes the medical care expenses in the period the medical care services are provided. For FY 2021 through FY 2025, the average medical care cost per year is \$108.3 billion.

NOTE 19. FUNDS FROM DEDICATED COLLECTIONS

Funds from Dedicated Collections are individual funds with explicit authority to retain revenues and/or other financing sources not used in the current period for future use. VA's Funds from Dedicated Collections consist of trust, special, and revolving funds. Trust funds do not involve a fiduciary relationship with an individual or group but are designated exclusively for a specific activity, benefit, or purpose.

VA's funds are grouped as insurance, medical care, benefits and burial in the following tables.

Dedicated Collections Fund Name	Authority	Purpose of Fund	Financing Source
Servicemembers' and Veterans' Group Life Insurance	38 U.S.C.1969	Insurance to active-duty, ready and retired reservists, and cadets attending service academies and Reserve Officers' Training Corp and to Veterans.	Public, Veterans
Veterans Reopened Insurance Fund	38 U.S.C.1925	Insurance to World War II and Korean War Veterans.	Public, Veterans
Service-Disabled Veterans Insurance Fund	38 U.S.C.1922	Insurance to Veterans with service-connected disabilities.	Public, Veterans
National Service Life Insurance Fund	38 U.S.C.1920	Insurance - Premiums insure World War II Veterans.	Public, Veterans
Veterans Special Life Insurance Fund	38 U.S.C. 1923	Insurance - Premiums insure Korean conflict and post-Korean Conflict Veterans.	Public, Veterans
Veterans Affairs Life Insurance	38 U.S.C.1922B	Insurance to Veterans with service-connected disabilities.	Veterans
Canteen Service Revolving Fund	38 U.S.C.78	Medical Care - Operates the canteen services at hospitals.	Revenue from product sales
Medical Care Collections Fund	P.L. 105-33 111 Stat 665	Medical Care - Third-party and patient co-payments for medical services.	Public, primarily insurance carriers
General Post Fund, National Homes	38 U.S.C.8301	Medical Care - Donations for patient benefits.	Public, mostly Veterans
Post-Vietnam Era Veterans' Educational Assistance Program	38 U.S.C.3222	Benefits - Subsidizes the cost of education to Veterans.	Veterans, DoD
Cemetery Gift Fund	38 U.S.C. 2407	Burial - Donations for Veterans cemeteries.	Public donors
National Cemetery Administration Facilities Operation Fund	P.L. 108-454	Burial - Proceeds benefit land and buildings.	Proceeds from buildings/land leases

NOTE 20. EXCHANGE TRANSACTIONS

A. EXCHANGE REVENUES

Exchange revenue consists primarily of medical revenue recognized when earned from other Federal agencies or the public as a result of costs incurred or services performed on their behalf. Medical revenue is earned by VA when services are provided and are billable to the first-party (Veterans) and third-party insurance companies. Under 38 U.S.C., Chapter 17, VHA is authorized to bill a Veteran's third-party health insurer for health care provided at VA and non-VA medical facilities. Generally, VA considers a Veteran's health care billable if the treatment is not for a service-connected disability.

B. PUBLIC EXCHANGE TRANSACTIONS

Exchange revenue is usually based on the full cost associated with the goods exchanged or services performed. VHA has legislative exceptions to the requirement to recover the full cost to the Federal Government of providing services, resources, or goods for sale. Under "enhanced sharing authority," VHA facilities may enter into arrangements for sharing facilities, contracts for services, and contracts for use of equipment where reimbursement rates are negotiated in the best interest of the Federal Government.

Under 38 C.F.R. § 17.101, reasonable costs are used to bill for reimbursable health care services, public workers' compensation, tort and no-fault, or uninsured motorists' insurance cases. Under regulations issued pursuant to 38 U.S.C. § 1729, third-party payers may elect to pay VA's billed costs (less applicable deductible or copayment amounts) for the care and services provided to Veterans, or they may elect to pay VA an amount that it would pay to other providers for care and services in the same geographic area. Under this methodology, the billable amounts for services provided by VA represent the 80th percentile of nationwide average rates developed from commercial and Medicare statistical data by locality throughout the Nation. The statistical data is adjusted by the Consumer Price Index to account for the historical nature of the data being used. The billable amounts by service provided are developed based on the classification of services as inpatient, outpatient, professional, surgical, or non-surgical. The nationwide average rates used to determine billable amounts for services provided for inpatient care are updated annually effective October 1, and nationwide average rates for billable amounts for outpatient and professional care are updated annually effective January 1. The updated charges are published by a Notice in the Federal Register and the charges are available on the VHA Office of Integrated Veteran Care website. Revenue earned but unbilled is estimated using historical average data. An allowance for contractual adjustments from insurance companies and uncollectible amounts is determined using historical average data.

Per 38 C.F.R. § 17.102, cost-based and inter-agency per diems are calculated annually to produce rates used to bill for medical care or services provided by VA that are:

- (a) Furnished in error or based on tentative eligibility;
- (b) For a medical emergency, workers' compensation (intragovernmental only) or humanitarian emergency;
- (c) To pensioners of allied nations;
- (d) For research purposes in circumstances under which VA medical care appropriation is to be reimbursed by VA research appropriation; and

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

- (e) To beneficiaries of the DoD or other Federal agencies, when the care or service provided is not covered by an applicable sharing agreement.

These per diem costs are derived primarily from cost and workload data from the VHA Office of Finance cost reports.

VA's Loan Guarantee Program collects certain fees that are set by law authorized in 38 U.S.C. § 3729, such as loan guarantee funding fees and loan guarantee lender participation fees. A person who pays a fee for a loan guaranteed or insured after December 31, 1989, or who is exempt from payment of the fee, will have no liability to VA for any loss resulting from default except in the case of fraud, misrepresentation, or bad faith. This exemption does not apply to manufactured homes under Section 3712 or to loan assumptions. Rental fees are collected on a small number of properties during the period when the property is titled to VA.

NCA also has the following exchange revenue activities:

- Lodge leases with not-for-profit groups and employees for historic preservation, office space, or temporary housing. Lessees are generally responsible for lodge upkeep, utilities, insurance, minor repairs, and other maintenance costs.
- Vacant land leases for agricultural farming, private business use, and for use by local community-based entities. Based on the agreement terms, lessees pay rent monthly or annually.
- Annual fees from commercial entities for easements to access land.

Because VA receives immaterial revenue from the NCA lodge, vacant land, and easement arrangements described above, VA does not recognize lease receivables or unearned revenue for these leasing arrangements.

FINANCIAL SECTION

NOTES TO THE FINANCIAL STATEMENTS

NOTE 22. DISCLOSURES RELATED TO THE STATEMENT OF BUDGETARY RESOURCES**A. BORROWING AUTHORITY**

The Home Loan Guarantee Program principal repayment is expected over a 30-year period from the date of issuance of debt. Borrowing is repaid to Treasury through the proceeds of portfolio loan collections and funding fees. The Vocational Rehabilitation Program principal repayment is expected within 10 months from the date of issuance of debt. Loans generally have a duration of one year and repayment is made from offsetting collections.

	2025	
<i>(dollars in millions)</i>		Interest Rate
Home Loan Guarantee Program	\$ 8,735	4.53%
Vocational Rehabilitation Program Direct Loans	\$ -	4.81%

B. PERMANENT INDEFINITE APPROPRIATIONS

VA has three permanent and indefinite appropriations to cover housing financial transactions and unexpected housing losses: (1) the Veterans Housing Benefit Program Fund account covers all subsidy re-estimate costs (that is, costs to the Government for original subsidy and re-estimates subsidy) associated with loan obligations and loan guarantees committed since 1992 for Veterans' housing benefits, (2) the Native American Veteran Housing Loan Program account covers all subsidy re-estimate costs arising from Veteran Native American direct loan obligations, and (3) the Vocational Rehabilitation Loan Program account funds loan subsidy re-estimates.

C. EXPLANATIONS OF DIFFERENCES BETWEEN THE STATEMENT OF BUDGETARY RESOURCES AND THE BUDGET OF THE U.S. GOVERNMENT

The following table reflects material differences between the FY 2024 Statement of Budgetary Resources and the FY 2024 actual amounts reported in the FY 2026 President's Budget of the U.S. Government. The FY 2026 President's Budget was released in June 2025 and may be obtained from OMB (the Technical Supplement to the 2026 Budget – Appendix) or the Government Publishing Office. The budget with the actual amounts for FY 2025 has not been released yet.

<i>(dollars in millions)</i>	Total Budgetary Resources	New Obligations & Upward Adjustments	Distributed Offsetting Receipts	Net Outlays

*This represents credit reform financing accounts, net outlays.

D. USE OF UNOBLIGATED BALANCE OF BUDGET AUTHORITY

Within the Statement of Budgetary Resources, the Unobligated Balances represent apportioned and unapportioned amounts of unexpired VA funds. It also includes expired authority, which remains available for 5 additional fiscal years for recording and adjusting previously recorded obligations but cannot be used to fund new obligations.

E. UNDELIVERED ORDERS AT THE END OF THE PERIOD

(dollars in millions)

As of September 30,

2025

	Paid	Unpaid

Unobligated Balance from Prior Year Budget Authority, Net	\$ 42,282	\$ 8,414

NOTE 23. PRIOR PERIOD ADJUSTMENT

The EHRM program is a major initiative by the VA to replace its legacy electronic health record system (VistA) with a commercial off-the-shelf-solution developed by Oracle Cerner. The goal is to create a single, interoperable health record that seamlessly integrates with DoD and other Federal partners, improving continuity of care for Veterans throughout their lifetimes. Launched in 2018, the EHRM program is one of the largest and most complex IT modernization efforts in the Federal government. It is designed to:

- Enhance clinical decision-making and patient safety
- Improve data sharing between VA, DoD, and community providers
- Standardize workflows across VA medical facilities
- Support Veteran-centric care delivery

During FY 2025, certain expenditures associated with the EHRM program were adjusted for proper accounting treatment in accordance with SFFAS No. 10, *Accounting for Property, Plant, and Equipment*. VA accounted for the misclassification of software in development expenditures retrospectively, as depicted below in the FY 2025 Cumulative Results of Operations Beginning Balance of the Statement of Change in Net Position.

NOTE 24. BUDGET AND ACCRUAL RECONCILIATION

Budgetary accounting is used for planning and control purposes and relates to both the receipt and use of cash, as well as reporting the Federal deficit. Financial accounting is intended to provide a picture of the Government's financial operations and financial position, so it presents information on an accrual basis. The accrual basis includes information about costs arising from the consumption of assets and the incurrence of liabilities. The reconciliation of Net Outlays, presented on a budgetary basis, and the Net Operating Cost, presented on an accrual basis, provides an explanation of the relationship between budgetary and financial accounting information. The reconciliation serves not only to identify costs paid for in the past and those that will be paid in the future, but also to assure integrity between budgetary and financial accounting. The following analysis illustrates this reconciliation by listing the key differences between Net Operating Cost and Net Outlays.

NOTE 25. PUBLIC-PRIVATE PARTNERSHIPS

VA is engaged in various collaborative relationships with private sector entities in which the governance, roles, and responsibilities were determined to produce a risk-sharing arrangement. These relationships are referred to as public-private partnerships (P3). While many of VA's relationships may be referred to as a P3, only those meeting the disclosure requirements outlined in SFFAS No. 49, *Public-Private Partnerships: Disclosure Requirements* are disclosed in the tables below.

A. ENERGY SAVINGS PERFORMANCE CONTRACTS (ESPC) AND UTILITY ENERGY SERVICE CONTRACTS (UESC)

VA has entered into ESPC and UESC to procure energy savings and facility improvements. These contract vehicles do not require up-front capital costs or special appropriations from Congress.

Federal agencies are authorized to enter into ESPCs under National Energy Conservation Policy Act (42 U.S.C. § 8287), as amended. An ESPC is a partnership between an agency and an energy service company (ESCO) to reduce energy, water and/or related operating costs and to assist agencies with upgrading aging infrastructure, systems, and equipment. Upon conducting a comprehensive audit, the ESCO designs and constructs a project that meets the agency's needs and arranges financing to pay for the project. The ESCO guarantees that the improvements will generate sufficient energy cost savings to pay for the project over the term of the contract. In case the energy savings guaranteed targets are not being met, there is a possibility that the payments can be reduced.

By statute, ESPCs cannot exceed 25 years. VA obtains the title to all installed capital goods, equipment, and improvements upon completion of installation and acceptance by VA. After a contract ends, VA retains all additional cost savings. VA is responsible for contract administration over the term of the contracts.

Authorized by the Energy Policy Act of 1992, P.L. 102-486 (codified as 42 U.S.C. § 8256), UESC is a limited-source contract between a Federal agency and its serving utility for energy and water-efficiency improvements and demand-reduction services, allowing Federal agencies to pay for the services over time, either on their utility bill or through a separate agreement.

UESCs also cannot exceed 25 years in duration. After a contract ends, VA retains all additional cost savings. Under UESC, VA retains title to all installed capital goods, equipment, and improvements. Under OMB Memorandum M-98-13 and M-12-21, ESPC and UESC repayments can be funded on an annual basis. Contracts can be terminated for convenience in part or in full. In the case of a termination, VA may be responsible for outstanding loan balances and early termination or payment fees. Measurement and verification of energy savings is required under ESPCs and UESC.

The benefits of ESPCs and UESC include:

- Infrastructure improvements that pay for themselves over time; and
- Ability to install longer payback energy and water conservation measures by bundling savings with shorter payback measures.

NOTE 26. RECLASSIFICATION OF THE STATEMENT OF NET COST AND STATEMENT OF CHANGES IN NET POSITION FOR THE FINANCIAL REPORT COMPILATION PROCESS

To prepare the FR of the U.S. Government, Treasury requires agencies to submit an adjusted trial balance, which is a listing of amounts by U.S. Standard General Ledger (USSGL) account that appear in the financial statements. Treasury uses the trial balance information reported in the Governmentwide Treasury Account Symbol Adjusted Trial Balance System to develop a Reclassified Statement of Net Cost and Reclassified Statement of Changes in Net Position for each agency. Treasury eliminates all intragovernmental balances from the reclassified statements and aggregates lines with the same title to develop the FR statements.

This note shows VA's financial statements and VA's reclassified statements prior to elimination of intragovernmental balances and prior to aggregation of repeated FR line items. A copy of the FY 2024 FR can be found on Treasury's website and a copy of the FY 2025 FR will be posted to this site as soon as it is released.

REQUIRED SUPPLEMENTARY INFORMATION**DEFERRED MAINTENANCE AND REPAIRS**

Deferred maintenance and repairs are maintenance and repair activities not performed when they should have been or were scheduled to be and therefore, are put off or delayed for a future period. Activities include preventive maintenance; replacement of parts, systems or components; and other activities needed to preserve or maintain an asset. Maintenance and repair estimates are recorded for capitalized assets and are distinguished from capital improvements that expand the capacity of an asset or otherwise upgrade it to serve needs different from, or significantly greater than, its current use.

Management determines the level of service and condition that is acceptable to carry out VA's mission, which may vary by VA components that include VHA, VBA, NCA and Indirect Administrative Program Costs. It is VA's policy to ensure that medical equipment and critical facility equipment systems are maintained, repaired and managed in a safe and effective manner; therefore, deferred maintenance and repairs do not apply to these assets.

VA facilities reported their cost estimates for deferred maintenance and repairs by performing periodic Facility Condition Assessment (FCA) surveys, which are inspections of PP&E based on generally accepted methods and standards. These are consistently applied to assign condition ratings and estimate costs for each fixed asset to correct deficiencies. An independent interdisciplinary professional contractor team tours and evaluates approximately 6,000 VA buildings on a 3-year cycle, assessing all components. Building components assessed include architectural structural, mechanical, plumbing and electrical systems. Also included for assessment are capitalized, fully depreciated and noncapitalized elements of PP&E, heritage assets and stewardship land. Each PP&E component is given a description, an estimate of remaining useful life and a grade from "A" to "F" based on VA's standard evaluation guidelines. Any building component graded "D" (poor) and "F" (critical) is given an estimated correction cost and recorded in deferred maintenance and repairs, except where deficiencies will be replaced by capital expenditures. See Notes 1, 9, and 10 for additional information on PP&E and heritage assets.

VA is experiencing an upward trend in deferred maintenance and repairs as a result of: (1) increased maintenance and repair costs as buildings age; (2) maintenance and repair budgets that have not grown in proportion with an increasing portfolio of owned space and inflation rates; and (3) expanded scope of FCA survey requirements, which significantly increase cost estimates when sites are reevaluated.

LAND

VA acquires and maintains land for medical facilities, cemeteries and regional benefits offices, which support the Department's mission to provide Veteran services and benefits. The acquisition and disposal of VA's real property, including land, is primarily governed by title 38, United States Code. When acquiring land, VA uses demographic data applicable to proposed facilities, including information on the population of Veterans to be served by the facility. To timely dispose of vacant or unneeded land, VA surveys real property under the Department's custody or control to identify parcels that are not used, underused or not being put to optimum use.

VA LAND BY PREDOMINANT USE

Land held by VA is categorized into three predominant use categories: operational, conservation and preservation, and commercial in accordance with SFFAS No. 59, representing the land's actual use during the reporting period. The estimated acreage by each predominant use category is presented below.

Operational land is property that serves functions or activities directed toward achieving VA's mission. Most of VA's land holdings fall within this category and support activities such as clinical care and benefits provision. For more information, refer to Note 9.

Conservation and preservation land is VA property that is protected from further development in perpetuity. VA's land holdings in this category are national cemeteries, soldiers lots and monument sites. For more information, refer to Note 10.

Commercial land is property intended to generate a profit or commercial benefit. At VA, there are limited circumstances where previously underused property is leased to generate revenue that is then allocated to support VA's mission through the EUL program. For more information, refer to Note 25.

Land held for disposal or exchange are parcels that VA has deemed are no longer needed and are awaiting sale or transfer.

LAND RIGHTS

VA will seek to acquire land rights either by leasing land for parking or other purpose or by acquiring permanent or temporary easements from public or private owners to support its mission. As of September 30, 2025, VA had acquired lease rights to 85.57 acres of property mainly for purposes of parking to support VA medical facilities. These land leases are included in VA's overall leases numbers. For more information on VA's leases, refer to Note 16.
